

University of Arkansas at Pine Bluff

2012 AQUACULTURE/FISHERIES CENTER

Paid Summer Student Internship Program Announcement

The UAPB Aquaculture/Fisheries Center is offering 10-week paid summer internships in aquaculture/fisheries to freshmen and sophomore students at two-year and four-year universities.

Located in the heart of a vibrant aquaculture state, UAPB offers an opportunity for aquaculture students to interact with aquaculture industry leaders and to be involved with problem-solving research of high impact and transferability to the aquaculture industry. Special assistance is available for students interested in careers in aquaculture Extension. For students interested in natural fisheries issues, Arkansas offers the opportunity to study world-class bass, trout, crappie and other fisheries in the abundant rivers, streams and impoundments of the state.

Students can select from the following areas for their internship experiences:

- *Fish Diseases*
- *Nutrition*
- *Aquaculture Engineering/Equipment Development*
- *Extension Education/Outreach*
- *Fisheries Biology and Management*
- *Aquaculture Economics and Marketing*
- *Hatchery Management*
- *Catfish Production*
- *Baitfish Production*

Interns will have the opportunity to shadow a professional in the field for a day, tour aquaculture facilities and visit unique environments and ecosystems. Each intern will develop a PowerPoint-based seminar to present to the group prior to the end of the internship.
