Turfgrasses popular in Arkansas, such as bermudagrass (*Cynodon* spp.), centipedegrass (*Eremochloa ophiuroides*), St. Augustinegrass (*Stenotaphrum secundatum*), tall fescue (*Festuca arundinacea*) and zoysiagrass (*Zoysia* spp.), can all be established using sod. The University of Arkansas Cooperative Extension Service provides up-to-date information about choosing the best adapted species and cultivars for your lawn (see FSA2112, *Choosing a Grass for Arkansas Lawns*), seeding your lawn (see FSA2113, *Seeding a Lawn in Arkansas*) and about installing sod (see FSA2042, *Establishing a Lawn From Sod*). This directory was created to help homeowners and industry professionals locate producers of the species/cultivar they wish to plant. Additionally, this directory also includes information on the services available from each producer such as certified sod, delivery, retail, site preparation, sod installation, sprig installation, topsoil, wholesale and others. This sod directory includes only producers/distributors located in Arkansas, although information on obtaining out-of-state sod directories, where available, is provided at the end of this publication.

Creation of This Directory

Due to popular demand for this information in Arkansas, this directory is patterned after the design of CR6605, Oklahoma Turf Sod Source Directory, by Dennis Martin et al., Oklahoma Cooperative Extension Service.

Information in this directory was collected via a mail survey in the fall of 2007. Reminder post-cards were sent and follow-up phone calls were

made to confirm information and to encourage participation. Care was taken to identify the sod producers in Arkansas by way of personal communication, previous surveys, internet searches and yellow pages advertisements. Sod producers who did not participate in the survey are not included. Nursery and landscape operations not specializing in sod production or sales are not included in this directory. Sod producers or sod stores not listed in this publication who wish to participate in future revisions of this directory should contact Aaron Patton, turfgrass Extension specialist, by mail (PTSC 316, 1 University of Arkansas, Fayetteville, Arkansas 72701-1201) or by e-mail (ajpatton@uark.edu).

How to Use This Directory

Step 1. To locate the sod producer who carries the turfgrass species, cultivar or service you are interested in, please refer to Tables 1 and 2. First, locate the turfgrass species/cultivar or service you are interested in purchasing (located in the left column), then reference the producer number(s) located in the right column.

Step 2. Reference the producer number(s) found in Table 1 to the listing of producers/distributors. Sod producers/distributors are listed alphabetically with the producer number left of the company name.

Step 3. Once you have located a producer who carries the species/cultivar or service you are interested in purchasing, confirm that the services fit your needs. For example, homeowners will want to make sure the producer/distributor serves retail customers in addition to wholesalers.

This publication refers to wholesalers as those who would sell to commercial or professional turfgrass operations such as golf courses, sports fields, landscape architects, contractors or grounds maintenance professionals. Retail sales are those sales directed to the homeowner.

Services offered by the producer/distributor might include:

- aerification,
- Arkansas State Plant Board (ASPB) blue tag certified sod (certifies the genetic purity of the sod and that it is free of noxious weeds),
- big or mini roll sod,
- delivery,
- irrigation,
- plugs,
- sand-based sod (for sand-based soils),

- site preparation (preparing the site for establishment),
- sod (slabs, rolls or folds),
- sod or sprig installation,
- sprig sales (stems used to establish large areas),
- thick-cut sod (for in-season athletic field repair),
- topdressing,
- topsoil and
- washed sod (for golf course putting greens).

Step 4. Questions concerning the current availability and price of the sod or services as well as other specific information should be directed to the business by using the addresses or phone numbers provided.

Step 5. The location of the sod producer/distributor is given in Figure 1. Locations are approximate and are referenced by the producer number.

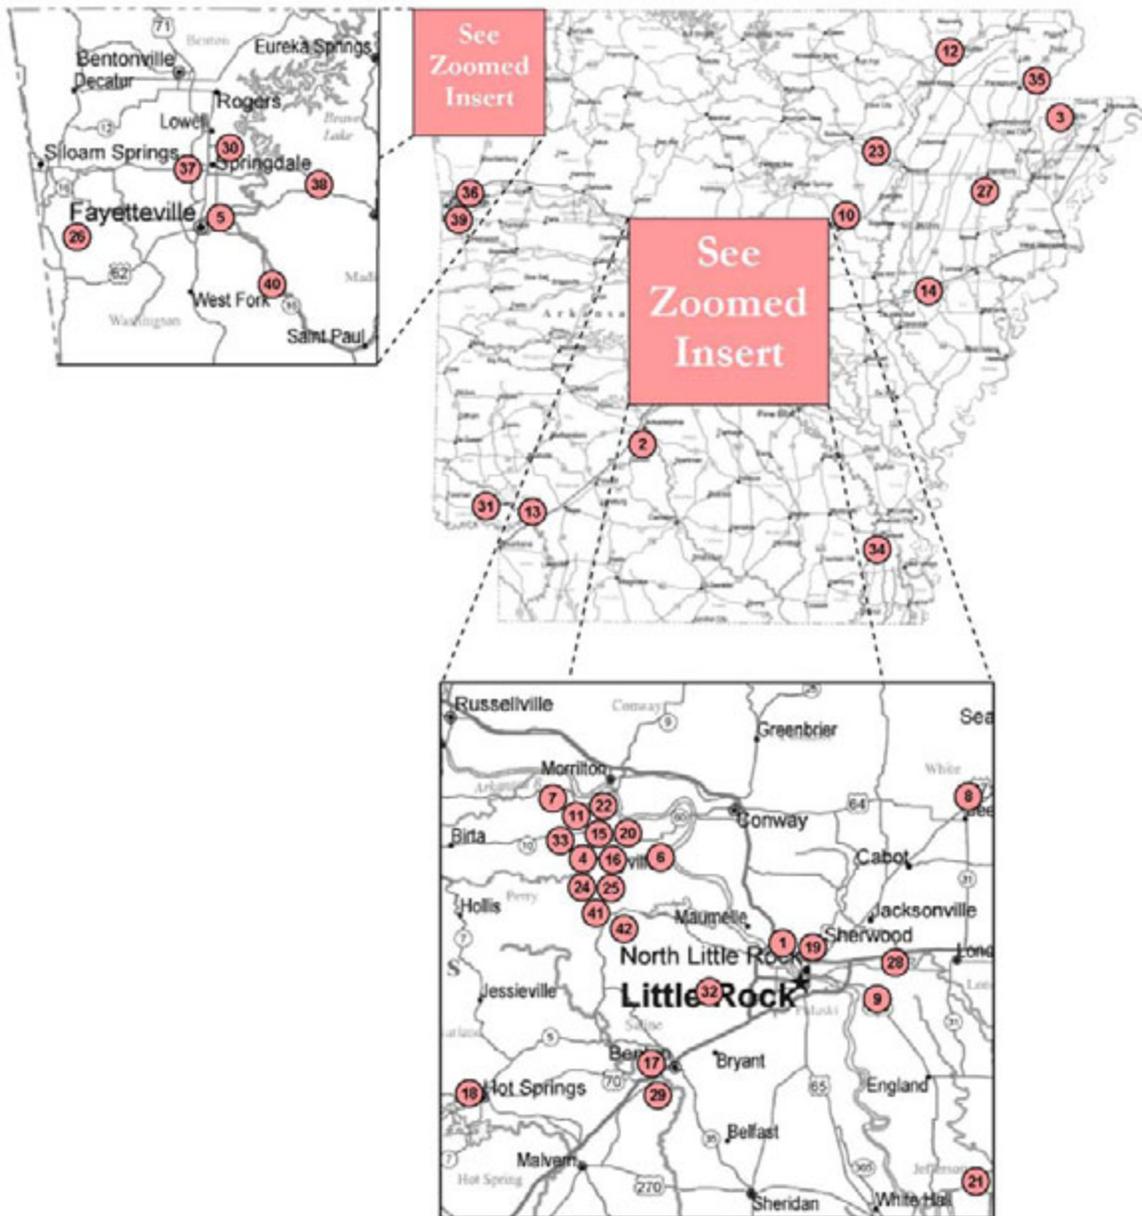

Figure 1. Approximate locations of sod producers in Arkansas. The numerical value corresponds to sod producer number.
