The numbers following each crop are approximate days from seed sowing to maturity.

The purpose of the Year-Round Home Garden Planting Chart is to show activities in the garden by season.

The closer to the bottom of the box a vegetable or activity is listed, the closer to the end of the month it should be planted or performed.

To produce tomato, broccoli, cabbage and cauliflower for fall crops, sow seed about four weeks earlier than suggested transplanting date.

This planting guide was prepared for persons in central Arkansas zones B and C. Adjust planting dates earlier or later depending on your particular zone.

For additional gardening information, see your county Extension agent and visit the University of Arkansas Division of Agriculture, Cooperative Extension Service web site at www.uaex.edu.

Acknowledgment is given to Dr. Hazell Reed at the University of Arkansas at Pine Bluff for the original concept of the Year-Round Home Garden Planting Guide.
