

Zimbra IMAP on the Droid

Follow the instructions below to set up IMAP access on the Droid.

NOTE: Please use your name not bmccree.

On your phone, press < Home >, then open the Email application.

On the “Your accounts” page, select Next to get started with setup.

Enter your UAEX email address (bmccree@uaex.edu) and UAEX password, then select Next.

Select IMAP account and then select Next.

On the Incoming server settings page, some fields may be pre-populated. Make sure to change the following:

For Username, enter your full UAEX email address (bmccree@uaex.edu)

For IMAP server, enter zmail.uaex.edu

For Port enter 993

For Security type select SSL (always)

Select Next.

On the Outgoing server settings page, some fields may be pre-populated. Make sure to change the following:

For SMTP server enter zsmtp.uaex.edu

For Port, enter 465

For Security type, select SSL (always)

Select Next and continue through the setup options.
