University of Arkansas

Foreword & Acknowledgments

The University of Arkansas Cooperative Extension Service is pleased to release these updated county profiles in hopes that these publications may serve as a useful tool for local officials, community leaders, and economic development professionals.

This publication provides a comparison and overview of the demographic, economic and social trends in Arkansas counties. The information is presented in graphs and maps to allow the reader to quickly grasp current trends and conditions and gain insight into local and regional contexts. We encourage leaders and decision makers to use this publication in conjunction with their knowledge of the local geography, culture and political environment to make wise decisions for Arkansas' future.

The State agencies providing data and assistance for this publication include the State Data Center at the University of Arkansas at Little Rock, the Arkansas Department of Workforce Services, the Arkansas Department of Education, and the Arkansas Department of Health and Human Services. We thank the many individuals at these departments and organizations for their quick response to our requests for information.

Several departments and individuals of the University of Arkansas worked in collaboration to publish these county profiles. Dr. Wayne Miller, Community and Economic Development, coordinated the project. Mr. Ben Olson compiled the data and developed graphs, maps, and charts. Mr. Todd Hodgson and Dr. Frank Farmer, Department of Consumer Environmental Sciences, provided the population pyramid. Dr. Frank Roth, formerly employed at the Southwest Research and Extension Center, provided information on the forestry industry. Katy Elliott, Community and Economic Development, edited the profiles while Donna Rinke and Paul Boliou, Communications Department, published the profiles on the Cooperative Extension website. Their many hours of effort are reflected in the quality of the publication.

We hope you find this publication useful as you plan for the future of your communities.

Dr. Ivory W. Lyles
Associate Vice President for Agricultural Extension

Population, 1960-2005
Johnson County

Figure 1

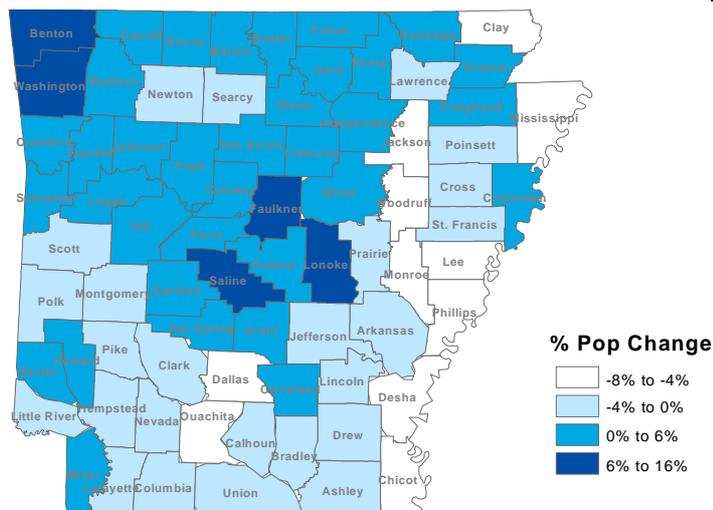

Source: 1960, 1960, 1970, 1980, 1990, and 2000 Census of Population & 2005 Population Estimates, U.S. Bureau of Census

The population of Johnson County almost doubled from 12,421 in 1960 to 24,042 in 2005.

Population Change, 2000-2004
The Natural State

Figure 2

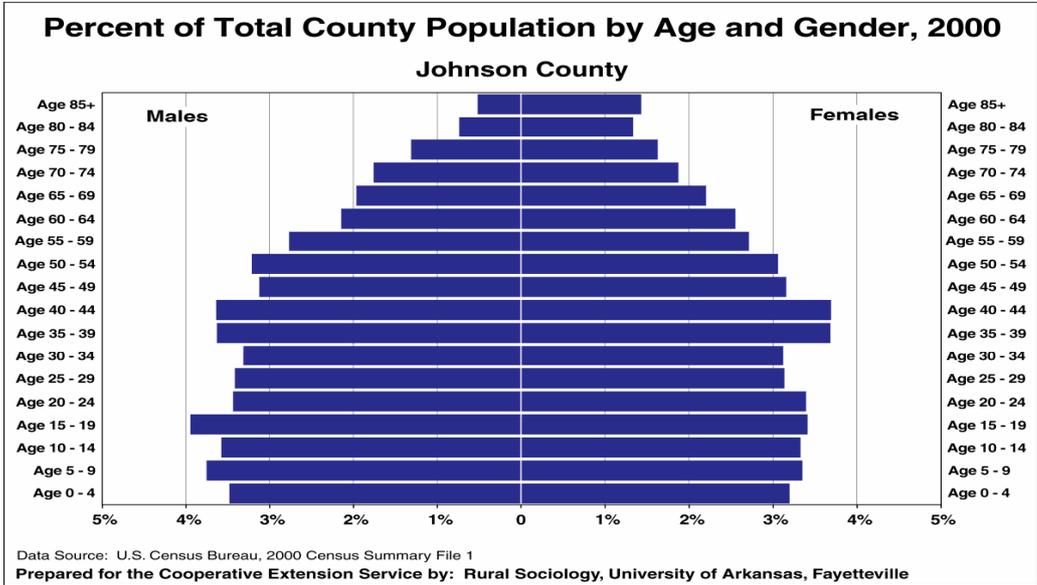

Source: 2000 Census of Population & 2004 Population Estimates, U.S. Bureau of Census

Population grew most rapidly in Northwest & Central Arkansas counties and declined in some East and South Arkansas counties.

Population

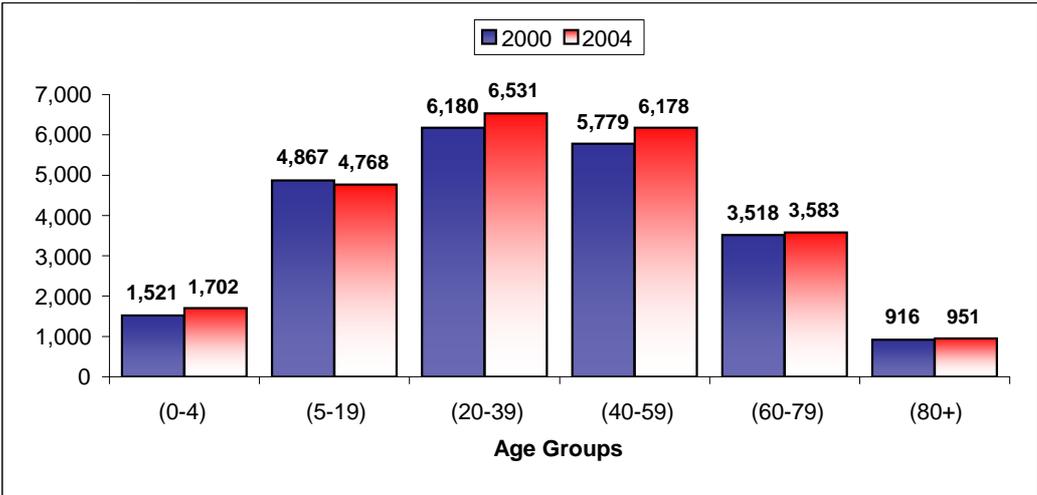

Figure 3

There are fewer people living in Johnson County between the ages of 20 to 34 than in both younger and older age categories.

Population by Age, 2000 & 2004 Johnson County

Figure 4

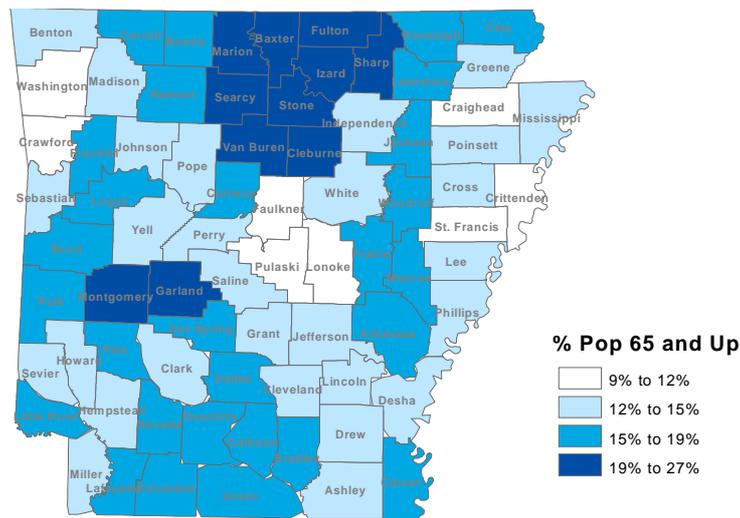

Source: 2000 Census of Population & 2004 Population Estimates, U.S. Bureau of Census

Population of most age groups in Johnson County increased between 2000 and 2004, with the exception of ages 5 to 19.

Population

Population 65 and Older, 2004
The Natural State

Figure 5

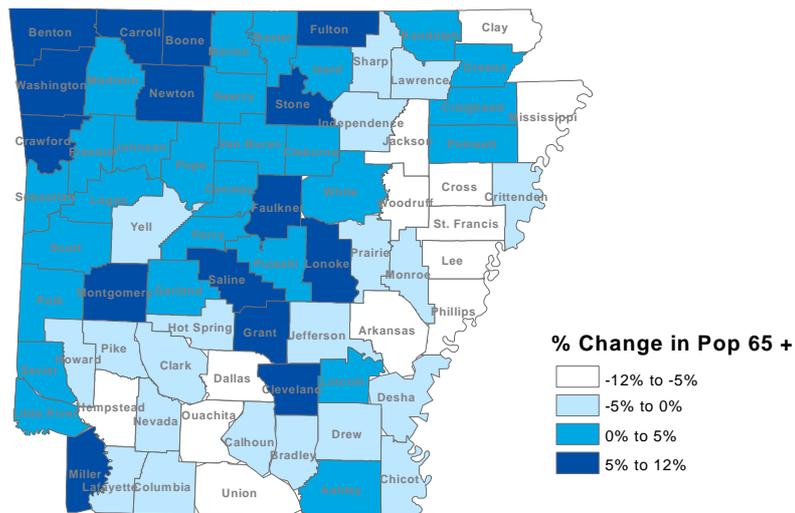

Source: 2004 Population Estimates, U.S. Bureau of Census

Counties in Northcentral Arkansas have the highest proportion of people aged 65 and older.

Population Change of People 65 & Older, 2000 - 2004
The Natural State

Figure 6

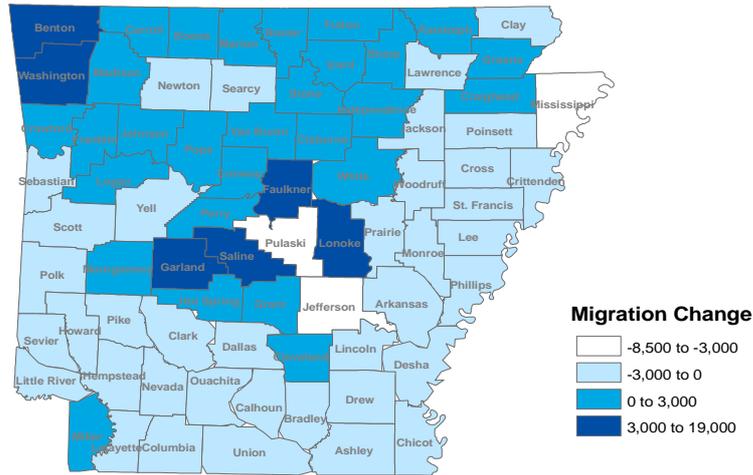

Source: 2000 Census of Population & 2004 Population Estimates, U.S. Bureau of Census

The elderly population as a proportion of the total population grew most rapidly in Central and Northwest Arkansas.

Population

Net Domestic Migration of People, 2000 to 2004 *The Natural State*

Figure 7

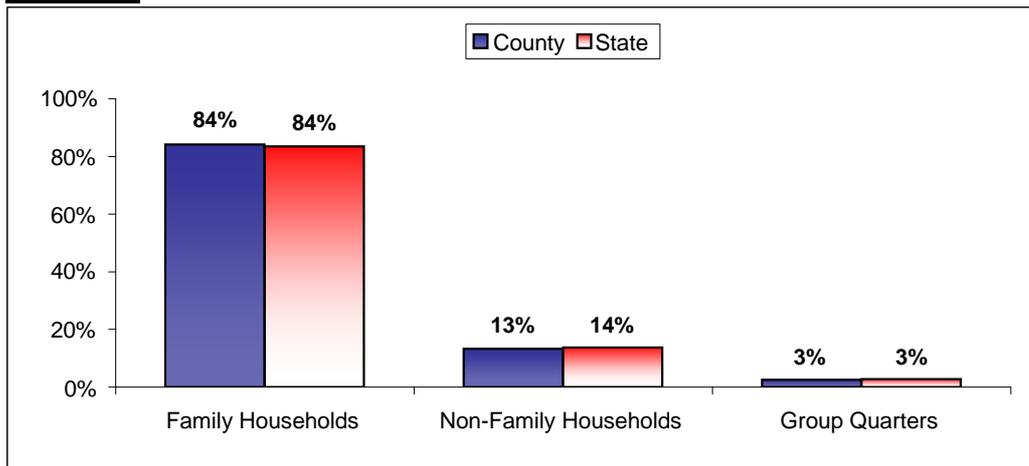

Source: 2000 to 2004 Population Estimates, U.S. Bureau of Census

Central & Northwest Arkansas had the highest in-migration of people between 2000 and 2004, while Pulaski, Jefferson, and Mississippi Counties had the largest out-migration of people during this period.

Population by Household Type, 2000 *Johnson County*

Figure 8

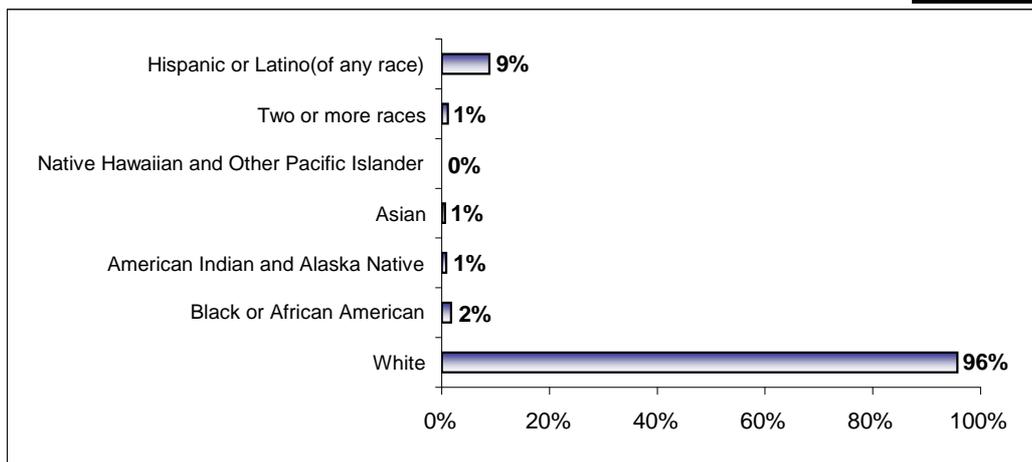

Source: 2000 Census of Population, U.S. Bureau of Census

Most of the people (84%) in Johnson County live in family households. The proportion of people living in all categories was close to the state average in 2000.

Population by Race, 2004
Johnson County

Figure 9

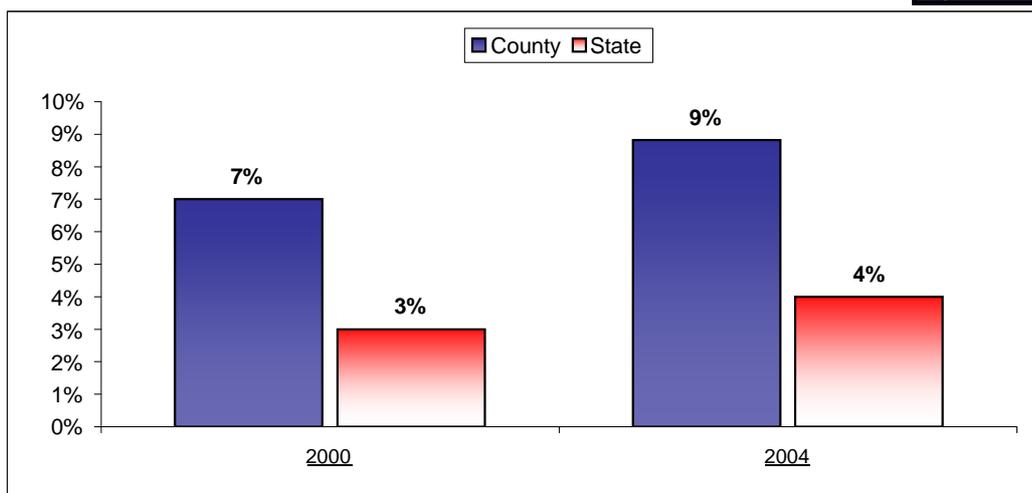

Source: 2004 Population Estimates, U.S. Bureau of Census

Ninety-six percent of the people living in Johnson County in 2004 were Caucasian. Two percent were Black or African American. Other minorities represented about two percent of the population.

Population of Hispanic Origin, State and County for 2000 & 2004
Johnson County

Figure 10

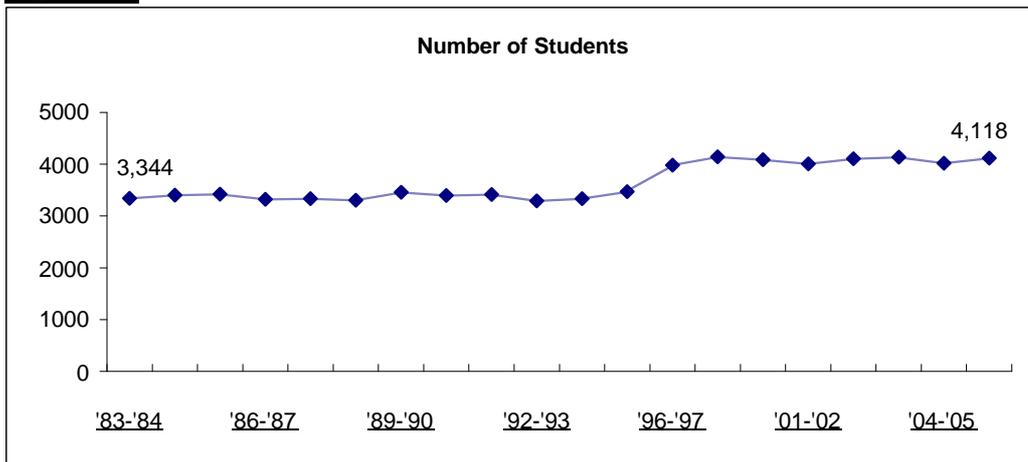

Source: 2000 Census of Population & 2004 Population Estimates, U.S. Bureau of Census

The proportion of Hispanic people living in Johnson County grew from seven percent of the population in 2000 to nine percent in 2004. The Hispanic population may be of any race: white, black or any other combination of races.

Education

Public School Enrollment, 1983-1984 to 2005-2006 Johnson County

Figure 11

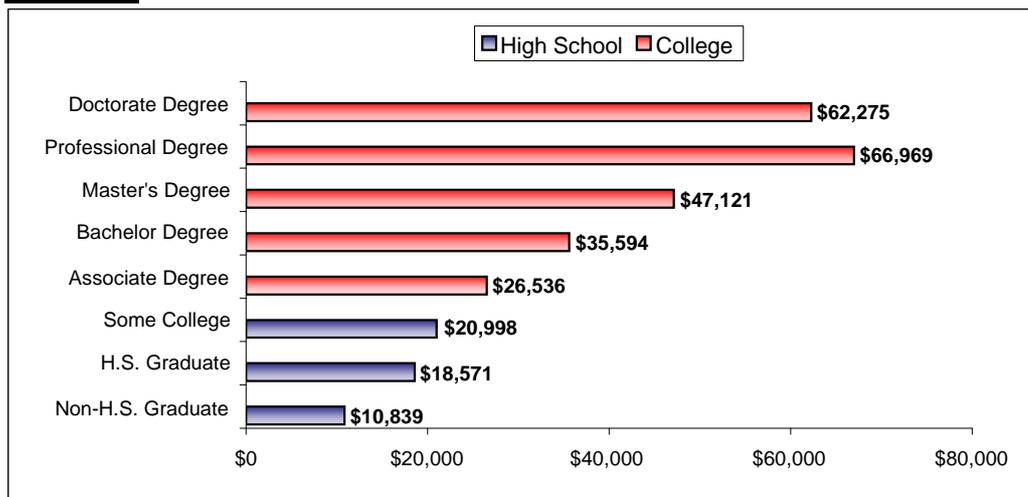

Source: Arkansas School Information Site (www.as-is.org), Arkansas Department of Education

Public school enrollment in Johnson County began to climb in 1992. Enrollment increased from 3,344 students in 1983-1984 to 4,118 students in 2004-2005.

Median Income By Educational Attainment, 1999 The Natural State

Figure 12

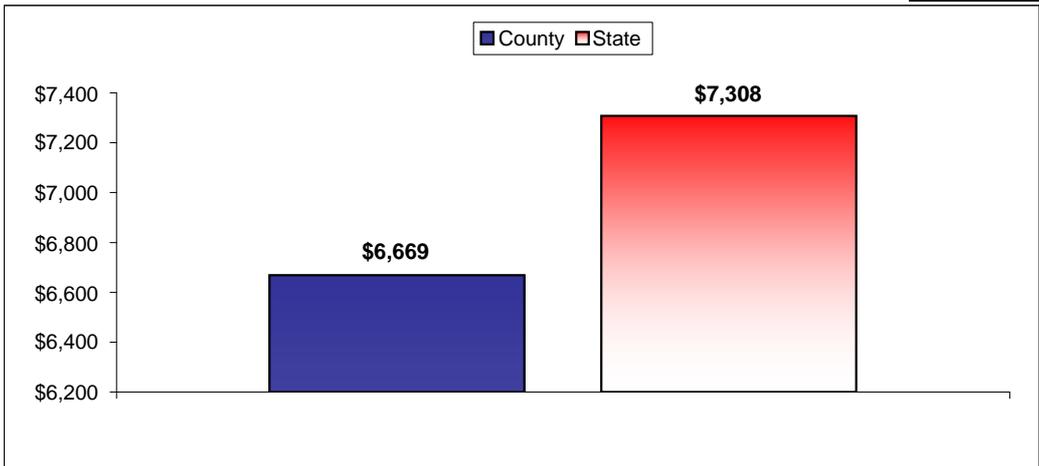

Source: U.S. Bureau of Census

The median income of people who have not graduated from high school is \$10,839 as compared to a median income of \$62,275 for people with a professional degree.

Education Expenditure Per Child, County & State 2003-2004
Johnson County

Figure 13

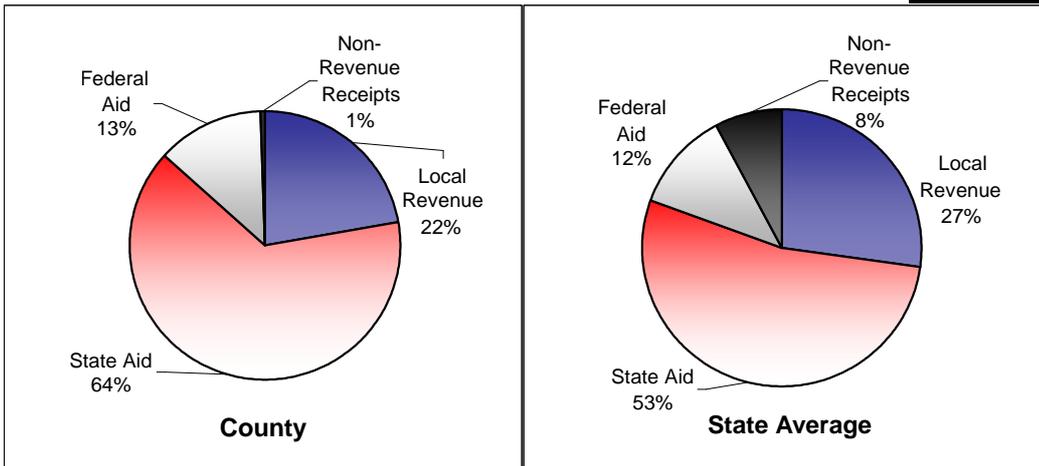

Source: Arkansas School Information Site (www.as-is.org), Arkansas Department of Education

Schools in Johnson County spent \$6,669 per child in the 2003-2004 school year as compared to an average expenditure of \$7,308 statewide.

Education Revenue By Source, County & State 2003-2004
Johnson County

Figure 14

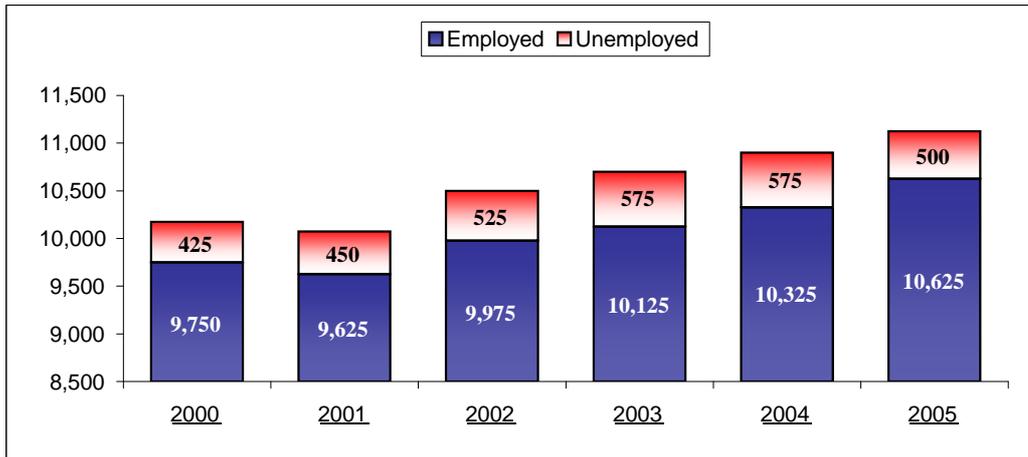

Source: Arkansas School Information Site (www.as-is.org), Arkansas Department of Education

Johnson County schools raised less of their revenue from local sources and more from state and federal aid than did the average of all Arkansas schools.

Employment

Labor Force, 2000 to 2005 Johnson County

Figure 15

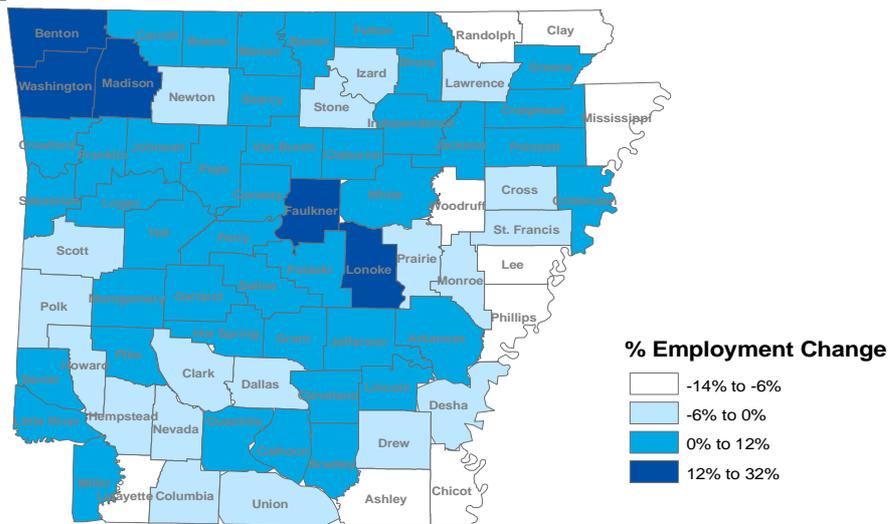

Source: Labor Market Information, Arkansas Employment Security Department

The Johnson County labor force gradually increased between 2000 and 2005.

Change in Employment, 2000-2005 The Natural State

Figure 16

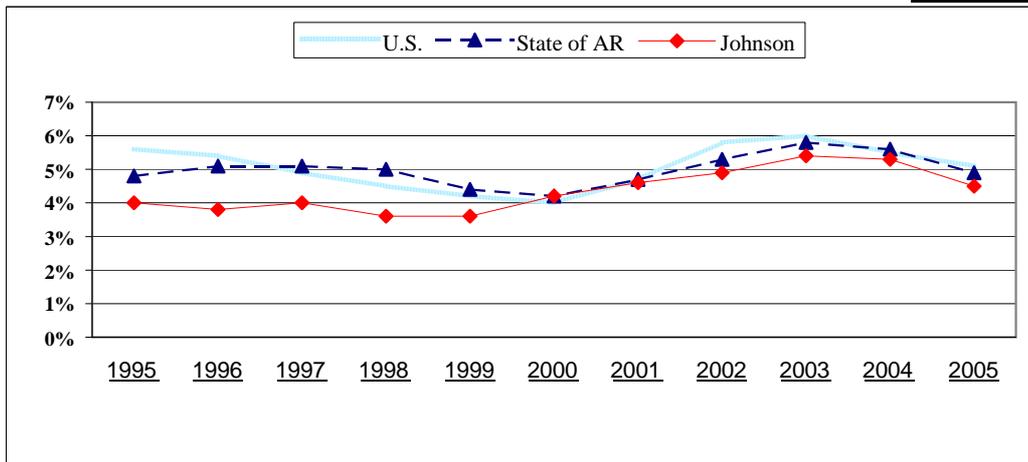

Source: Labor Market Information, Arkansas Employment Security Department

Employment growth was highest in Central & Northwest Arkansas between 2000 and 2005. Some counties in Southwest & Northcentral Arkansas also experienced employment growth.

Unemployment Rates, 1995 to 2005
Johnson County, State of AR, and United States

Figure 17

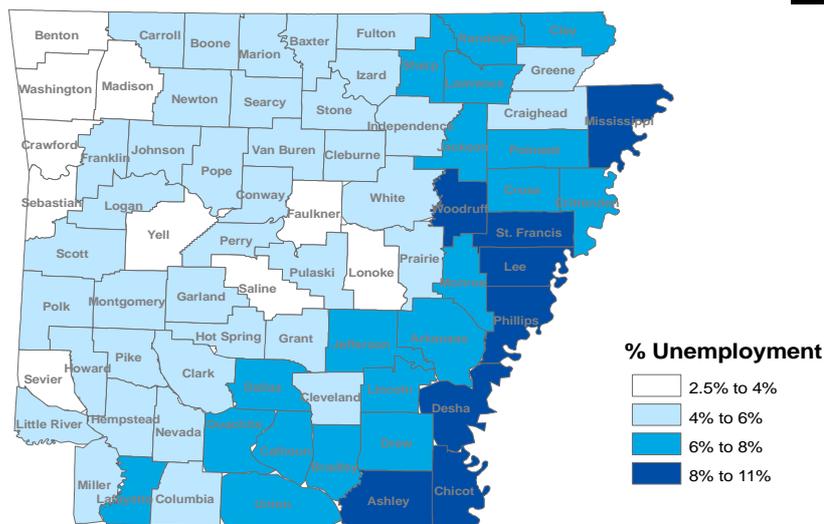

Source: Labor Market Information, Arkansas Employment Security Department

Unemployment rates in Johnson County remained below four percent between 1995 and 1999, then climbed to five and a half percent in 2003, then decreased to four and a half percent by 2005. During this period Johnson County unemployment rates remained below state and national averages, with the exception of 2000 and 2001.

Unemployment Rates, 2005
The Natural State

Figure 18

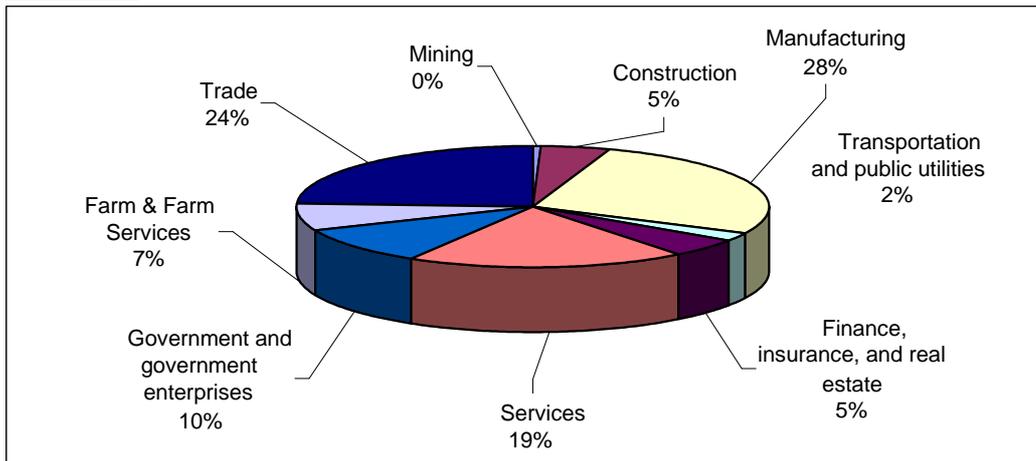

Source: Labor Market Information, Arkansas Employment Security Department

In general, Northwest, Central, and Western Arkansas counties have the lowest unemployment rates while Delta and Coastal Plain counties have the highest rates.

Employment

Jobs by Sector, 2003
Johnson County

Figure 19

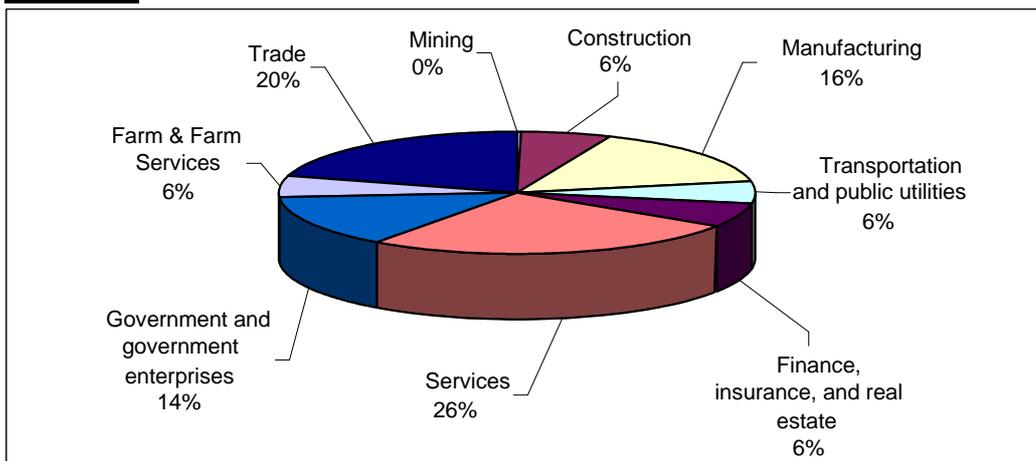

Source: Woods & Poole Economics, Inc

The manufacturing sector accounted for twenty-eight percent of jobs in Johnson County in 2003, while it accounted for sixteen percent of jobs for the state.

Jobs by Sector, 2003
The Natural State

Figure 20

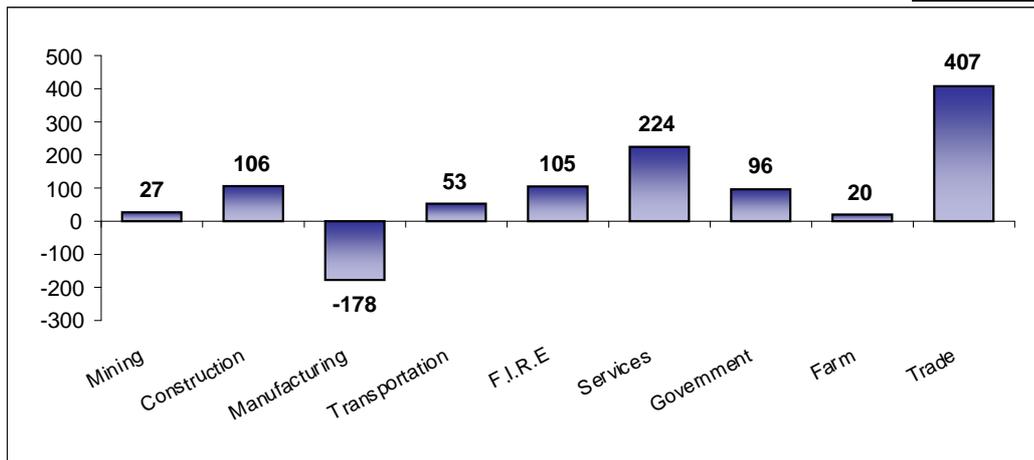

Source: Woods & Poole Economics, Inc

The service sector is the largest sector of the Arkansas economy, providing over one-fourth of the jobs in Arkansas. Combined, the service & trade businesses provide for nearly one-half (46%) of all jobs in Arkansas.

Changes in Jobs by Sector, 1999 to 2003
Johnson County

Figure 21

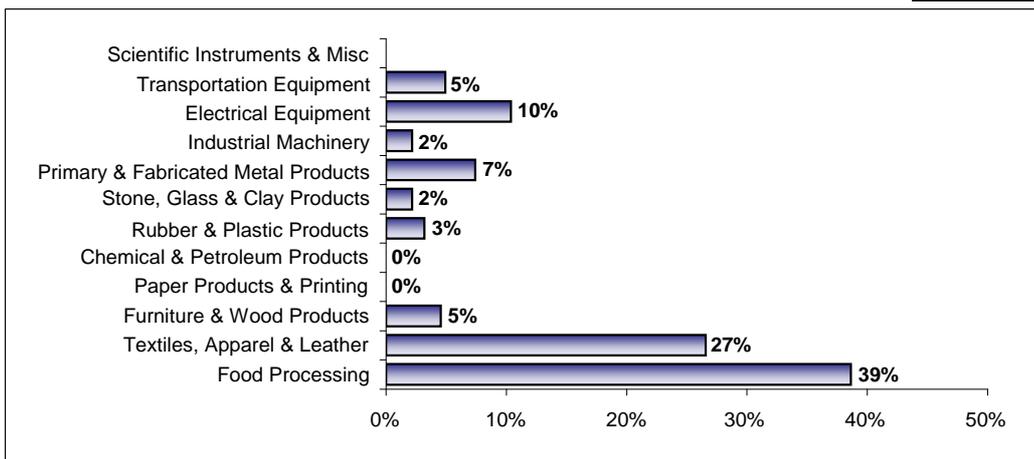

Source: Regional Economic Information System, U.S. Department of Commerce & Woods & Poole Economics, Inc

The trade and service sectors created the most new jobs between 1999 and 2003 in Johnson County. The manufacturing sector was the only sector to lose jobs during this period.

Jobs in Manufacturing, 2001
Johnson County

Figure 22

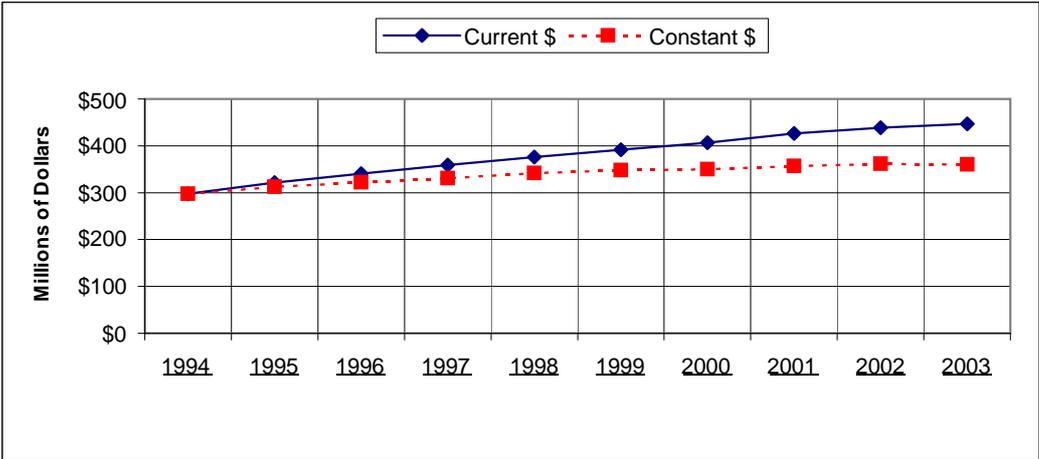

Source: 2001 Regional OneSource

Most of the jobs in the manufacturing sector in 2001 were in the food processing and textiles, apparel & leather industries.

Income

Total Personal Income, 1994 to 2003 Johnson County

Figure 23

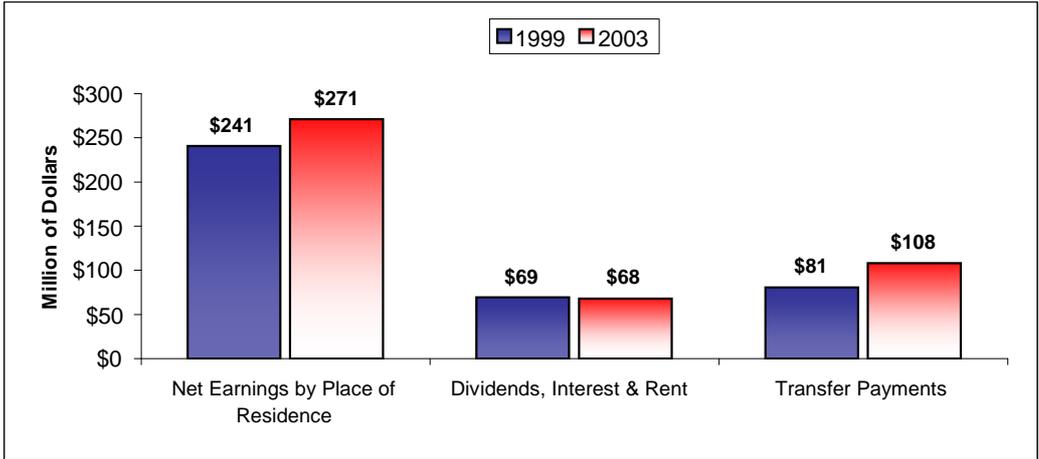

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

Total personal income (in constant dollars) in Johnson County climbed between 1994 and 2003 from \$300 million to \$360 million.

Income by Source, 1999 & 2003 Johnson County

Figure 24

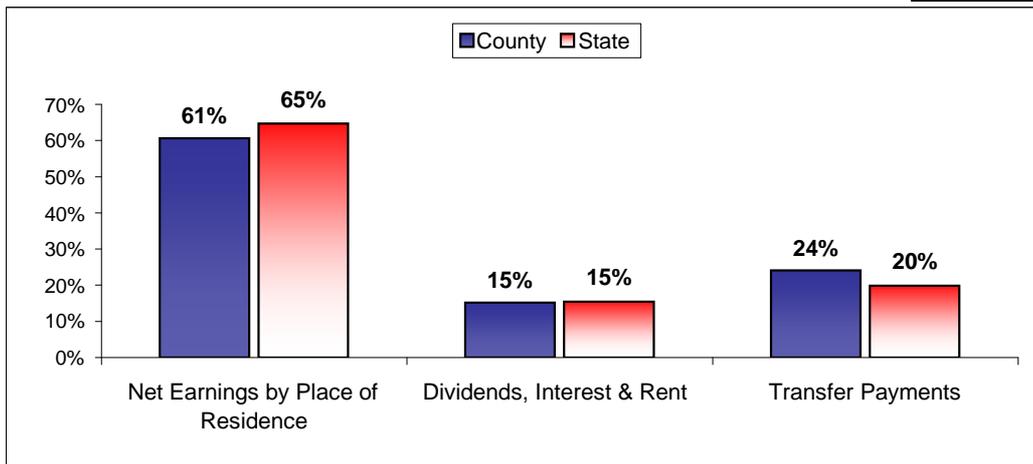

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

Although income from earnings and transfer payments in Johnson County increased between 1999 and 2003, income from dividends, interest & rent remained about the same.

Personal Income by Source, County and State 2003
Johnson County

Figure 25

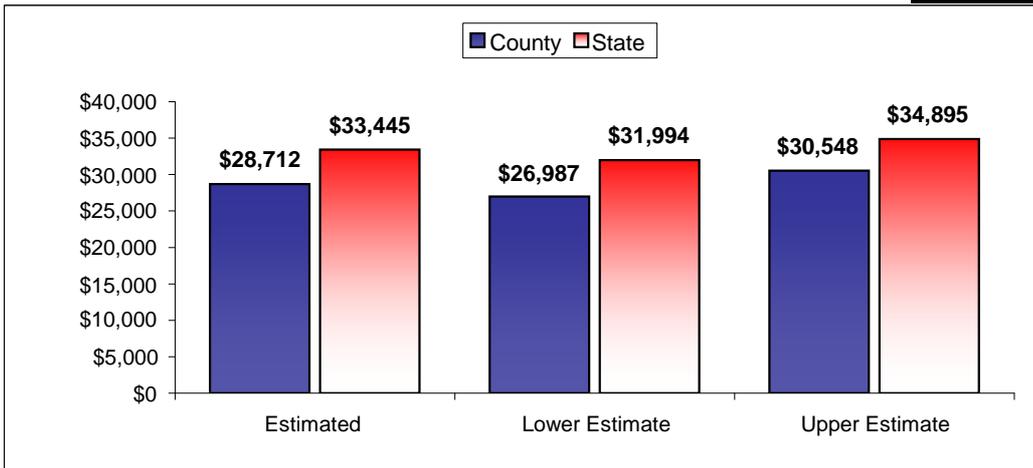

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

Johnson County residents received more of their income in 2003 from transfer payments and less from earnings than the average for all Arkansas residents.

Median Household Income, 2003
Johnson County

Figure 26

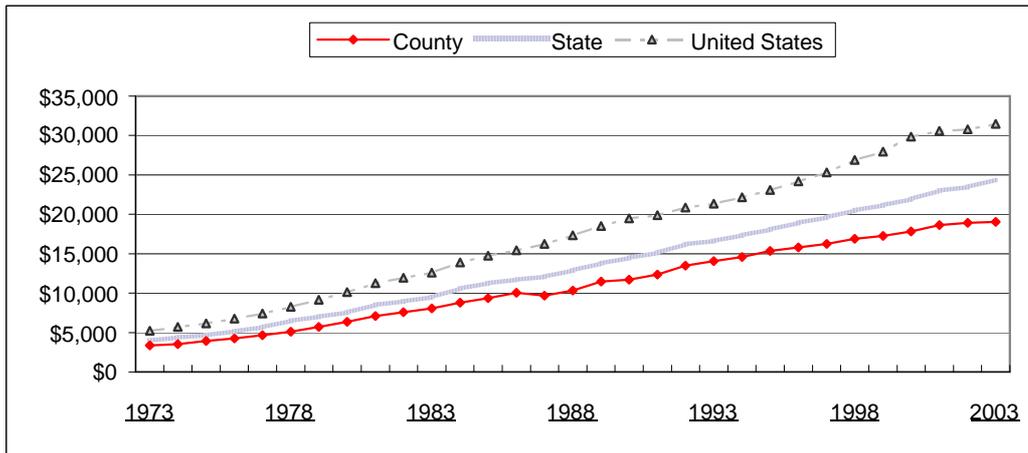

Source: Household Income Estimates, U.S. Bureau of Census

In 2003, median household income in Johnson County was lower than the state average.

Income

Per Capita Income, 1973 to 2003
Johnson County

Figure 27

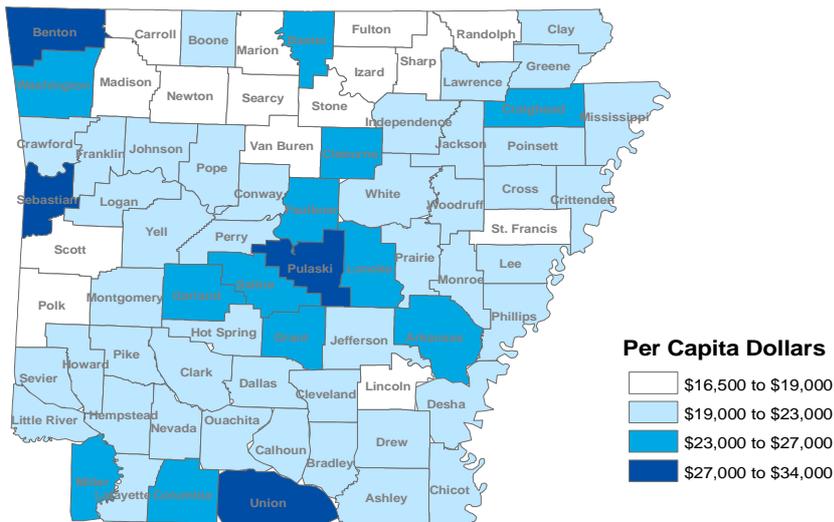

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

Johnson County per capita income has been lower than the U.S. and state averages since 1973. The gap between Johnson County and state per capita incomes grew larger during the 1980s and 1990s.

Per Capita Income, 2003
The Natural State

Figure 28

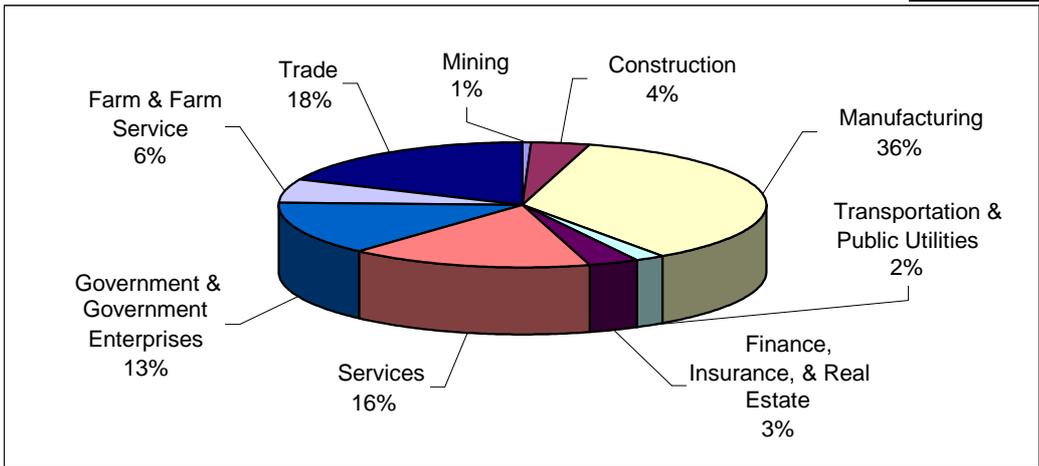

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

Per capita incomes are highest in Central & Northwest Arkansas and lowest in some Delta & Northcentral counties.

Earnings by Sector, 2003
Johnson County

Figure 29

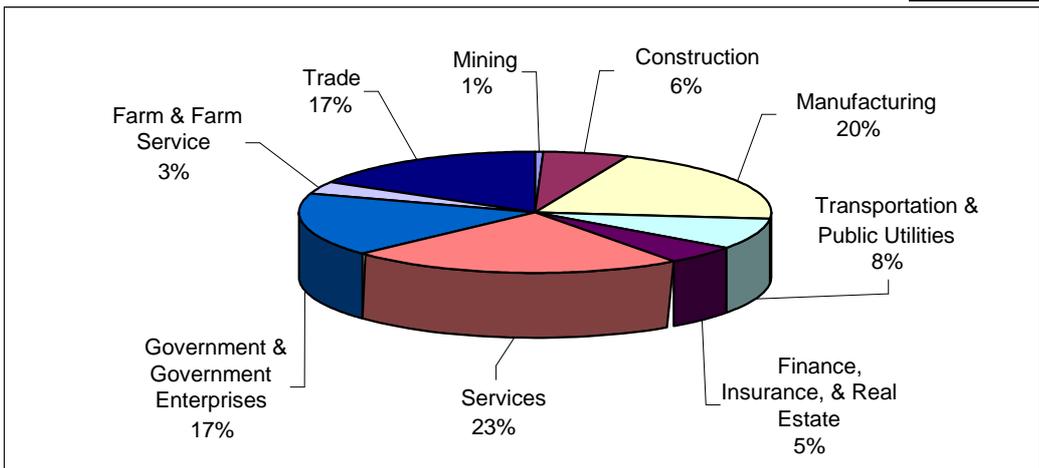

Source: Woods & Poole Economics, Inc.

In 2003, the manufacturing sector accounted for thirty-six percent of earnings in Johnson County. This is considerably higher than for the state economy where this sectors contributed only twenty percent of earnings.

Earnings by Sector, 2003
The Natural State

Figure 30

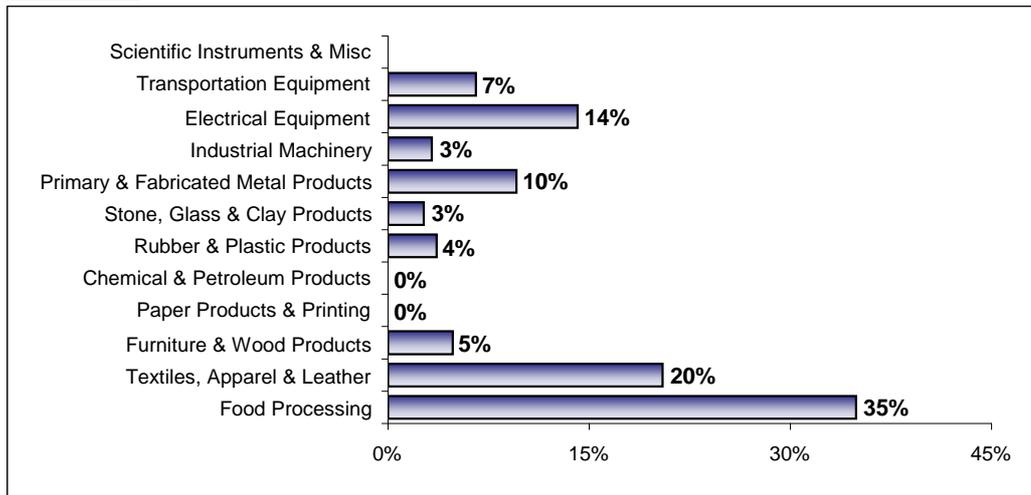

Source: Woods & Poole Economics, Inc.

The services sector is the largest sector in the state as measured by earnings. However, the manufacturing sector is a close second with twenty percent of earnings, while trade and government contributed seventeen percent of earnings from each sector.

Income

Earnings of Manufacturing Sector, 2001 Johnson County

Figure 31

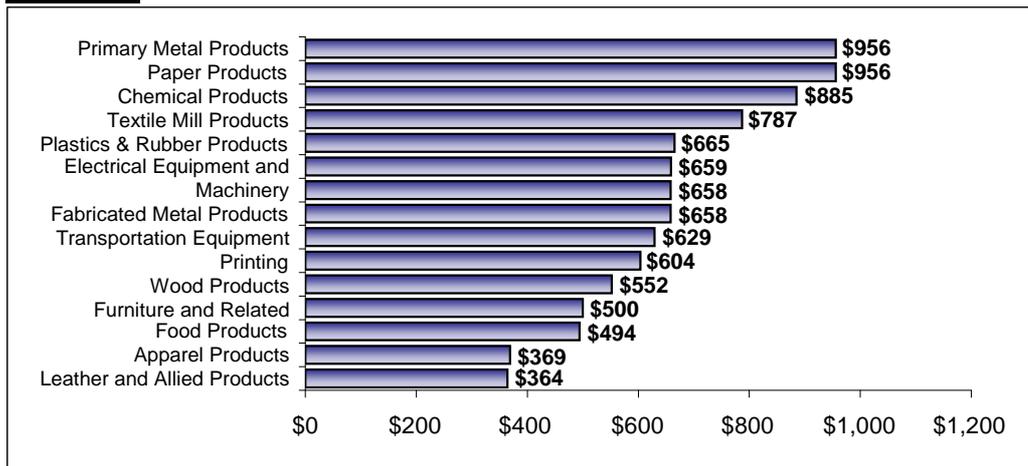

Source: 2001 Regional OneSource

Over one-third of the earnings in the manufacturing sector in 2001 came from the food processing industry in Johnson County. Another twenty percent came from the textiles, apparel & leather industry.

Average Weekly Earnings, 2004 The Natural State

Figure 32

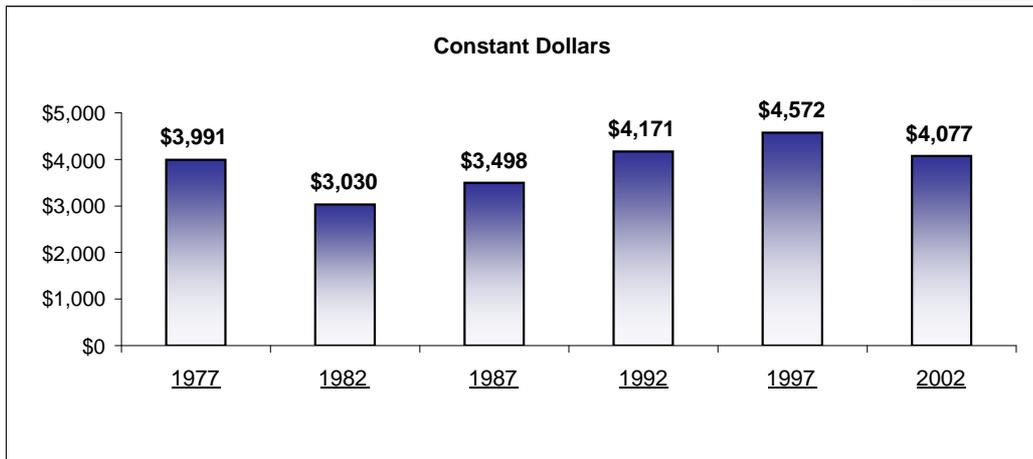

Source: Labor Market Information, Arkansas Employment Security Department

Average weekly earnings in the manufacturing sector range from a high of \$956 in both the paper products industry and the primary metal products industry to a low of \$364 in the leather and allied products industry.

Retail Sales Per Capita, 1977 to 2002
Johnson County

Figure 33

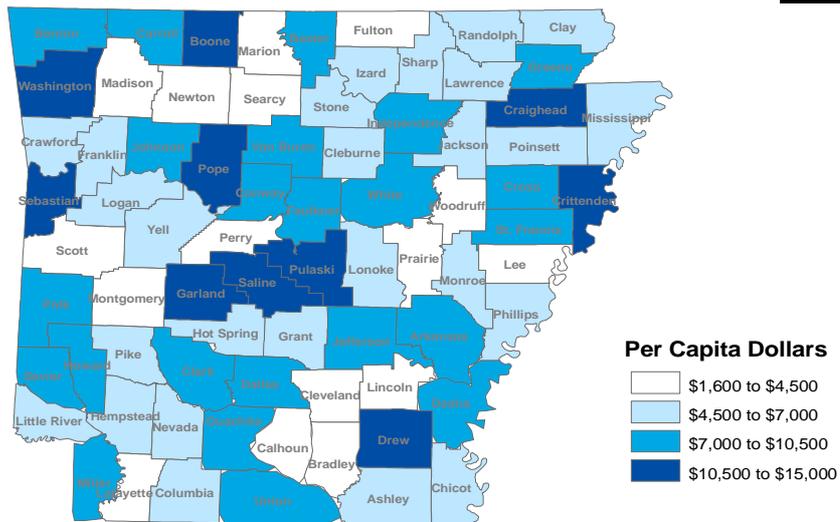

Source: Census of Retail Trade, U.S. Department of Commerce

Johnson County retail sales per capita grew from 1982 to 1997.

Retail Sales Per Capita, 2002
The Natural State

Figure 34

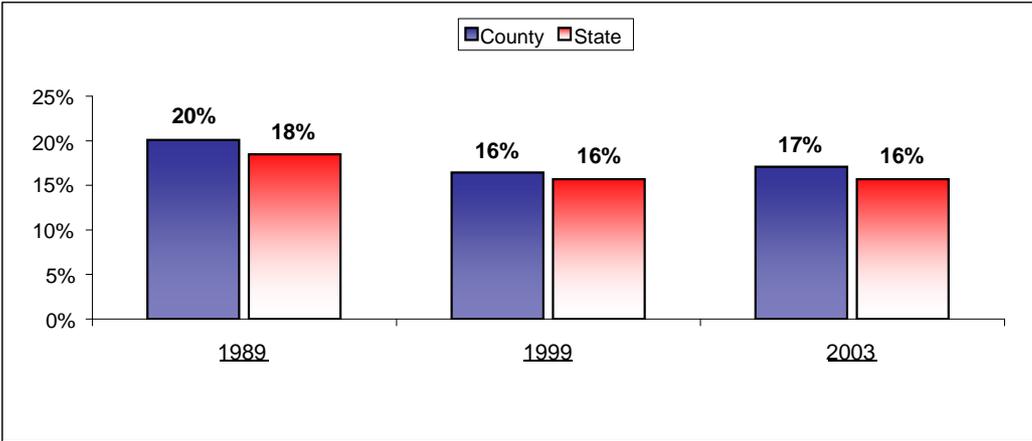

Source: Census of Retail Trade, U.S. Department of Commerce

Retail sales per capita are highest in counties with large towns and those that benefit from travelers and tourists.

Poverty

Persons Below Poverty Level, 1989, & 1999 & 2003
Johnson County

Figure 35

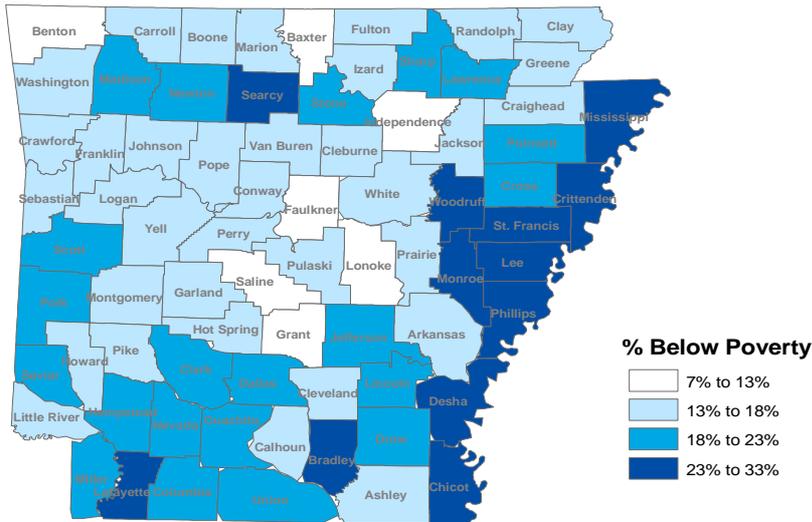

Source: Census of Population, U.S. Bureau of Census

Although the percentage of the Johnson County population below poverty level has decreased since 1989, it remained above the state average in 2003.

Estimated People Below Poverty Level, 2003
The Natural State

Figure 36

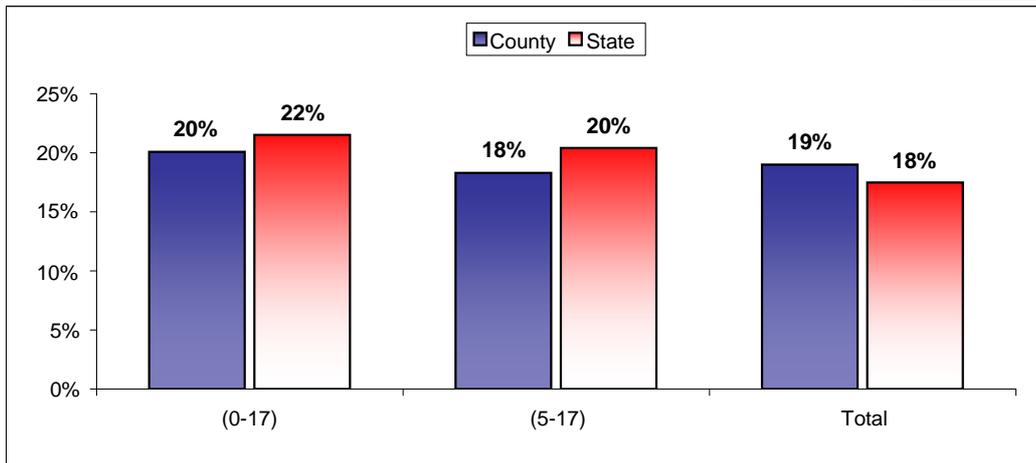

Source: 2003 Poverty Estimates, U.S. Bureau of Census

The estimated poverty level is highest in the Delta with many counties having a poverty level over eighteen percent.

Age Groups & Estimated Poverty, 1999
Johnson County

Figure 37

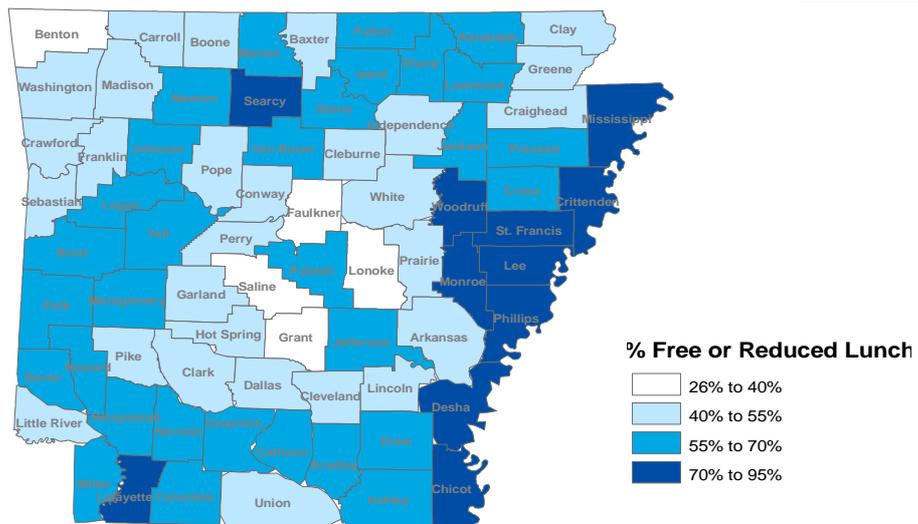

Source: 1997 Poverty Estimates, U.S. Bureau of Census

A larger proportion of children live in poverty than for the population as a whole. In 1999, Johnson County had a similar proportion of their children living in poverty than the state average.

Proportion of Students Receiving Free or Reduced Price Lunch, 2004-2005
The Natural State

Figure 38

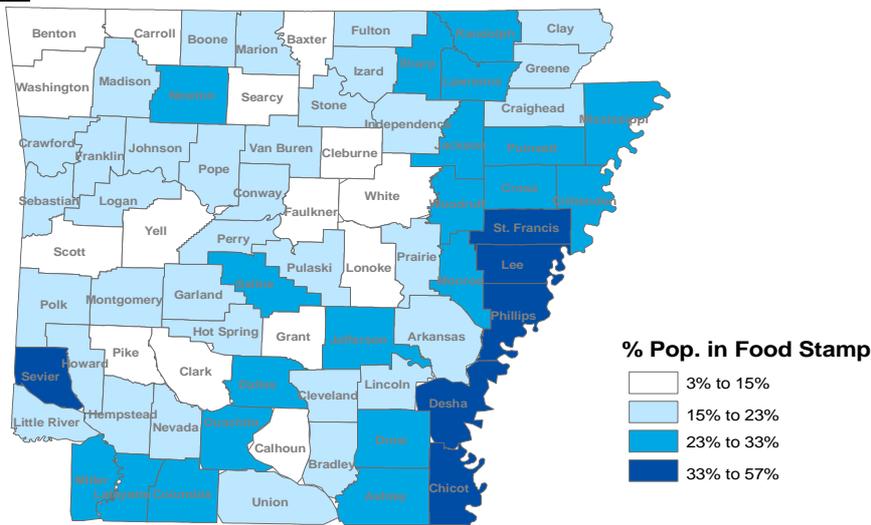

Source: Arkansas Department of Education

Across the seventy-five counties, there is a wide range in the proportion of students who receive free and reduced price school lunches. Participation rates range from twenty-six percent to ninety-five percent with youth in the Delta Region counties and Searcy and Lafayette Counties receiving the highest percentage of free and reduced price lunches.

Poverty

Proportion of Population Participating in Food Stamp Program, 2004 *The Natural State*

Figure 39

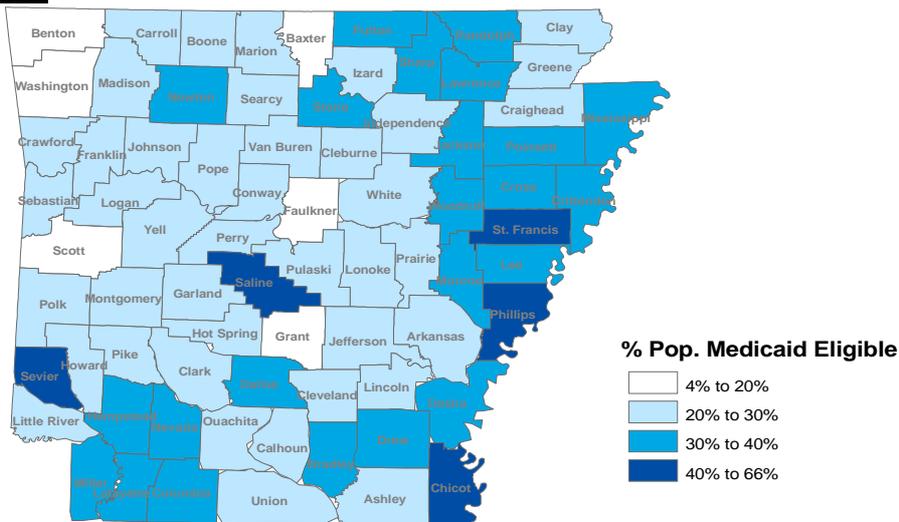

Source: 2004 Statistical Report, Arkansas Department of Human Services

A larger proportion of people living in the Delta counties participate in the Food Stamp Program when compared to people in other parts of the state.

Proportion of Population Medicaid Eligibles, 2004 *The Natural State*

Figure 40

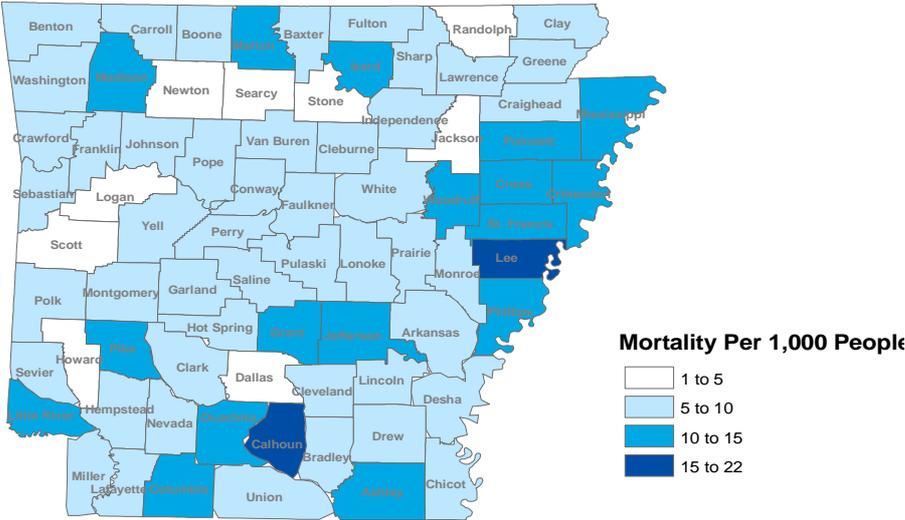

Source: 2004 Statistical Report, Arkansas Department of Human Services

In twenty-eight counties, primarily located in the Eastern and Southern parts of the state, a substantial percentage of the population (over 30%) is eligible for Medicaid.

Infant Mortality Rate, 2000 to 2004
The Natural State

Figure 41

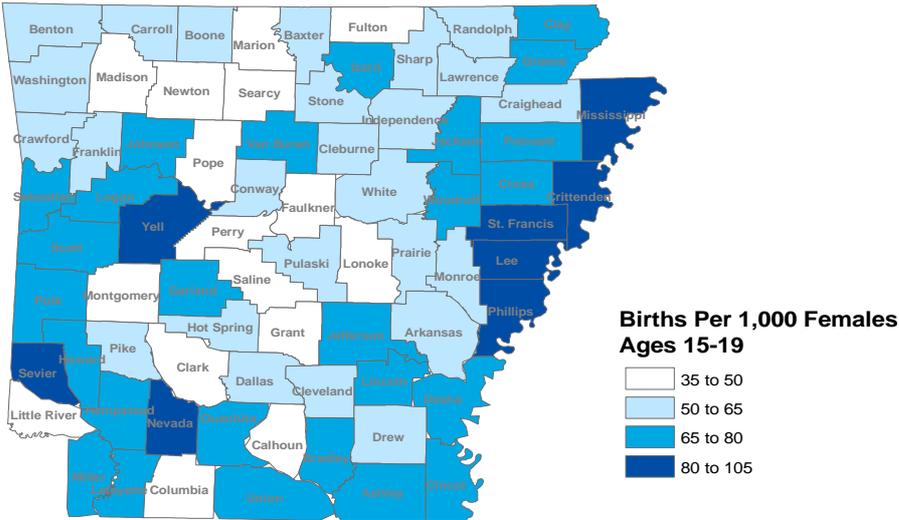

Source: County Trends in Maternal & Child Health, Center for Health Statistics, Arkansas Department of Health

The infant mortality rate is slightly higher in the Delta & Coastal Plain counties, with the exception of a few North Arkansas counties.

Teen Fertility Rate, 2000 to 2004
The Natural State

Figure 42

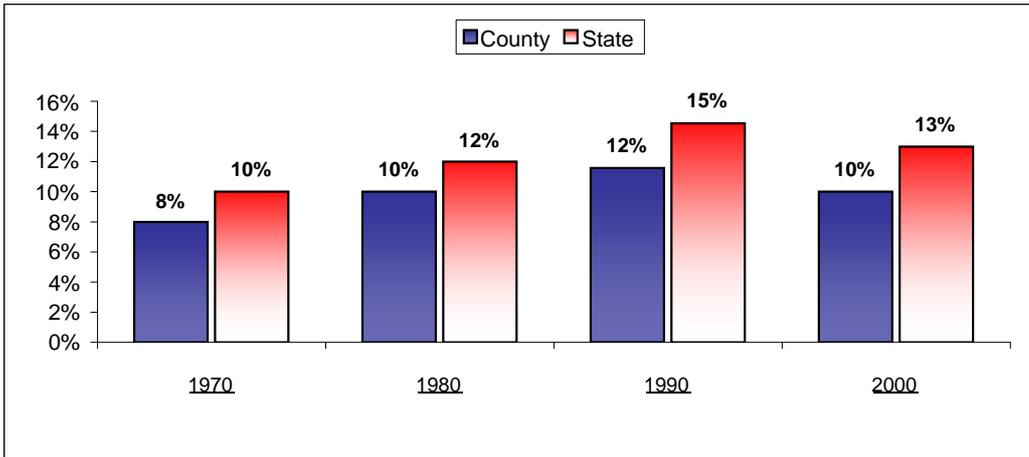

Source: County Trends in Maternal & Child Health, Center for Health Statistics, Arkansas Department of Health

The teen fertility rate varies from county to county across the state of Arkansas. Some Ouachita highland counties also have relatively high teen fertility rates. Counties with the highest teen fertility rates include Sevier, Yell, Nevada, Mississippi, Crittenden, St. Francis, Lee, and Phillips Counties.

Households

Female Headed Families, 1970, 1980, 1990, & 2000 Johnson County

Figure 43

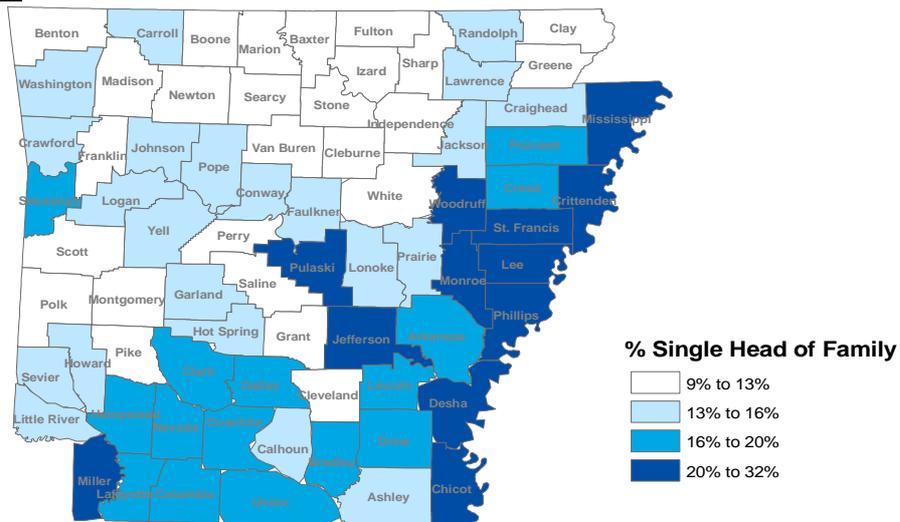

Source: 1970, 1980, 1990, and 2000 Census of Population, U.S. Bureau of Census

Female headed families as a proportion of total families in Johnson County have risen from eight percent to ten percent from 1970 to 2000.

Single Head of Family, 2000 The Natural State

Figure 44

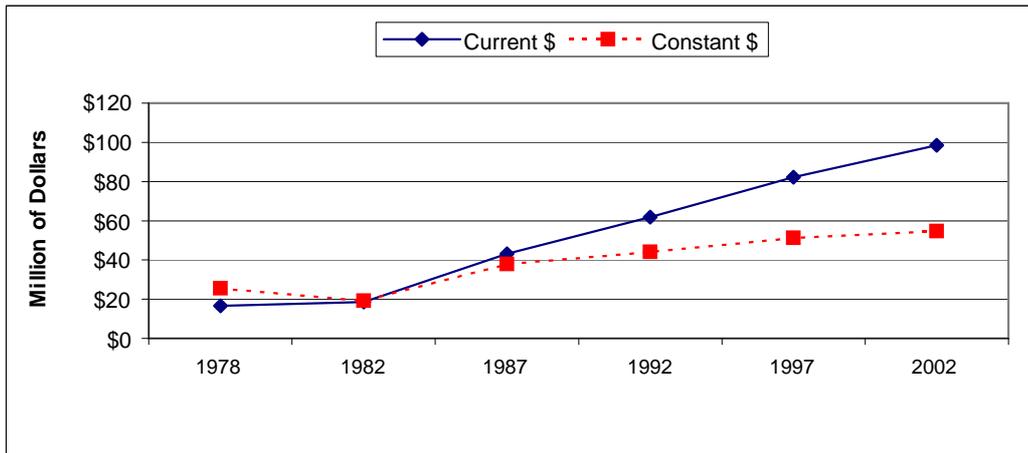

Source: 2000 Census of Population, U.S. Bureau of Census

The Delta counties followed by the Coastal Plains counties have the highest proportion of families with only a single parent present.

Market Value of Agriculture Products Sold, 1978 - 2002
Johnson County

Figure 45

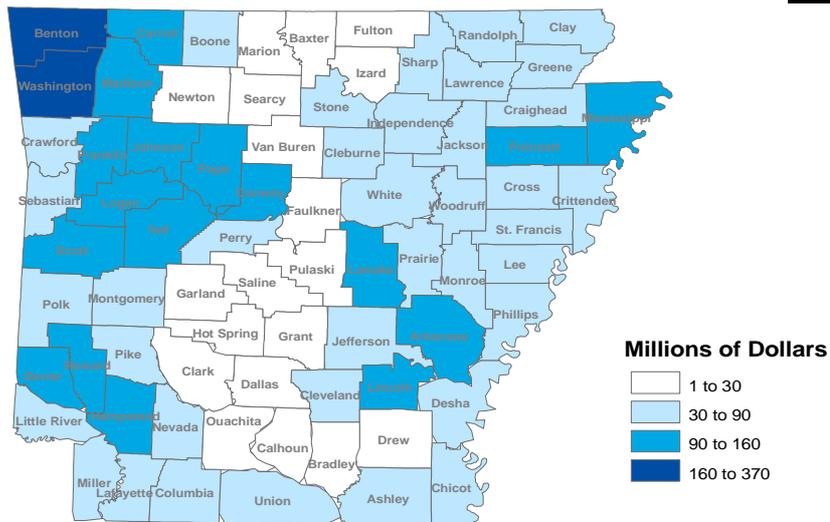

Source: Census of Agriculture, National Agricultural Statistical Service

Except for a small decline in 1982, the market value (in constant dollars) of agricultural products sold in Johnson County has increased steadily between 1978 and 2002.

Market Value of Agriculture Products Sold, 2002
The Natural State

Figure 46

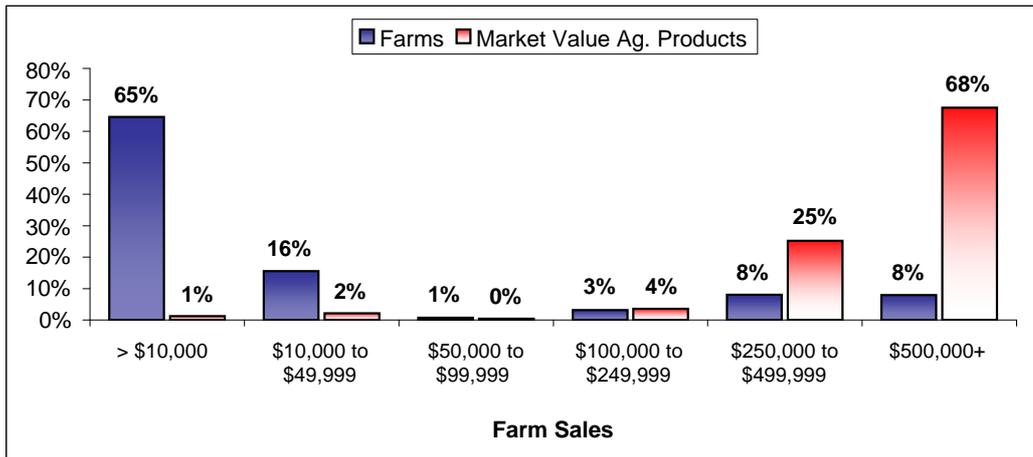

Source: 2002 Census of Agriculture, National Agricultural Statistical Service

The two counties with the highest market value of agricultural production are in Northwest Arkansas. However, many Delta counties and some Ouachita & Ozark mountain counties also rank high in terms of the market value of agricultural production.

Farms & Farm Sales by Size, 2002
Johnson County

Figure 47

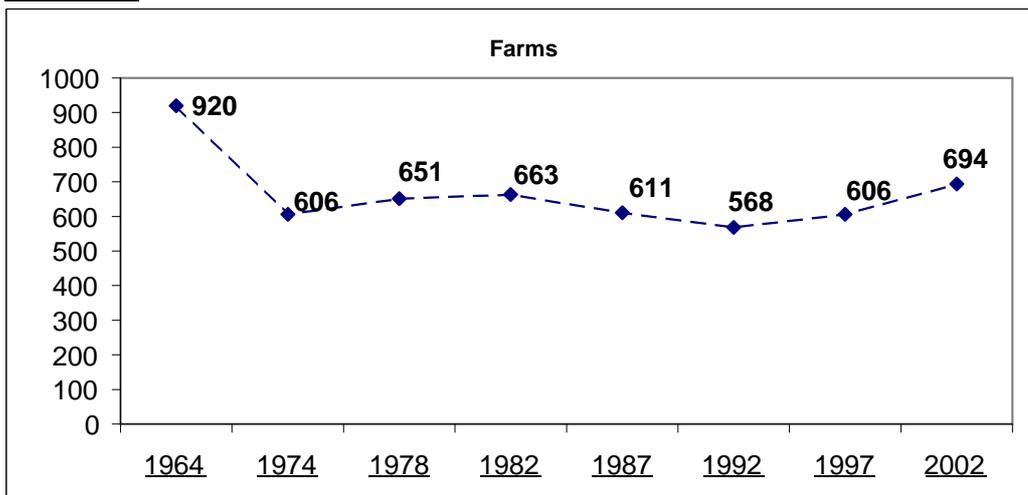

Source: 2002 Census of Agriculture, National Agricultural Statistical Service

In 2002, eighty-two percent of the farms in Johnson County had sales of less than \$100,000. These farms accounted for about three percent of total farm sales. Eight percent of the farms had sales of \$500,000 or more and these farms accounted for over two-thirds (68%) of total sales.

Number of Farms, 1964 - 2002
Johnson County

Figure 48

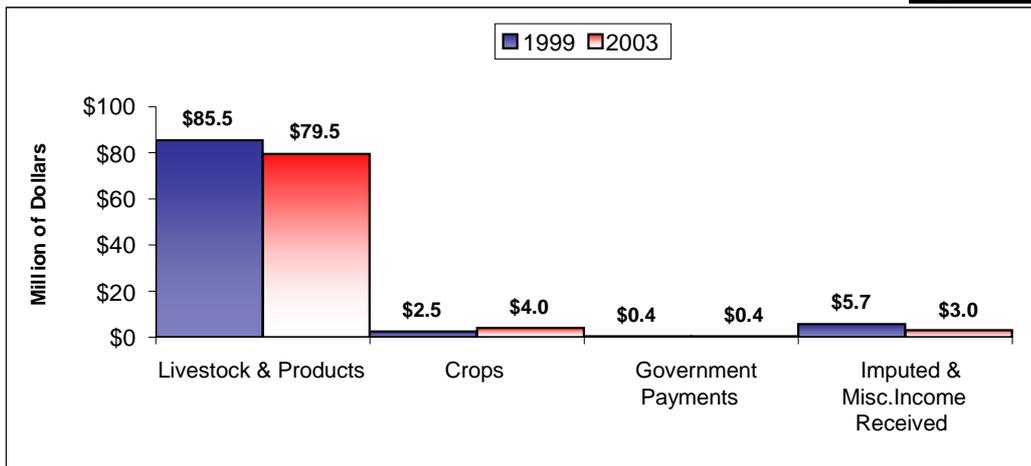

Source: Census of Agriculture, National Agricultural Statistical Service

The number of farms in Johnson County declined from 1964 to 1974, but between 1974 and 2002 remained between 600 and 700.

Source of Farm Income, County, 1999 - 2003
Johnson County

Figure 49

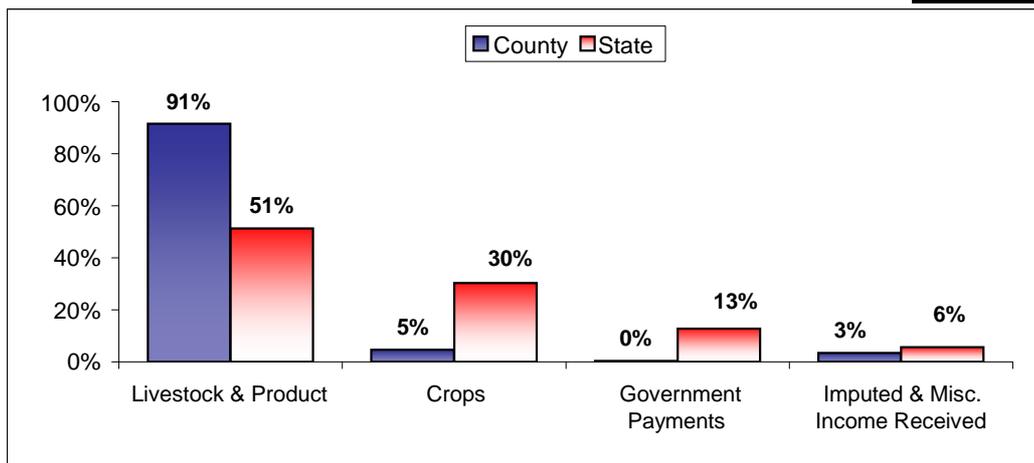

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

Livestock sales were the major source of income for Johnson County farmers between 1999 and 2003, though income from livestock & products and imputed & miscellaneous sources decreased during this period. Income from crops increased.

Source of Farm Income, County & State, 2003
Johnson County

Figure 50

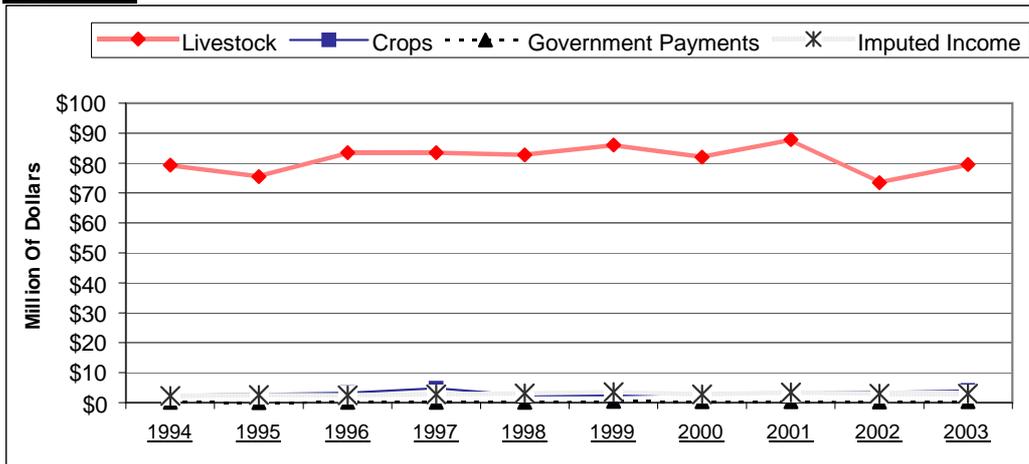

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

In 2003, Johnson County farmers received a higher proportion of their farm income from livestock & product than the average for all Arkansas farmers, though they received a lower proportion from crops, government payments, and imputed & miscellaneous sources.

Agriculture & Forestry

Farm Income, 1994 to 2003 Johnson County

Figure 51

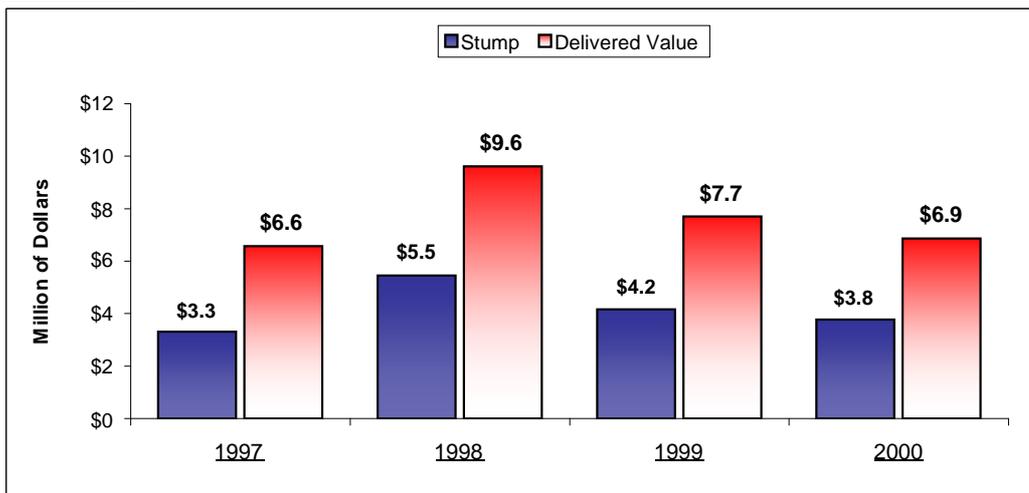

Source: Regional Economic Information System, U.S. Bureau of Economic Analysis

Between 1994 and 2003, farm income from livestock & product sales in Johnson County remained between \$70 million and \$90 million.

Stumpage & Delivered Value of Harvested Timber, 1997 to 2000 Johnson County

Figure 52

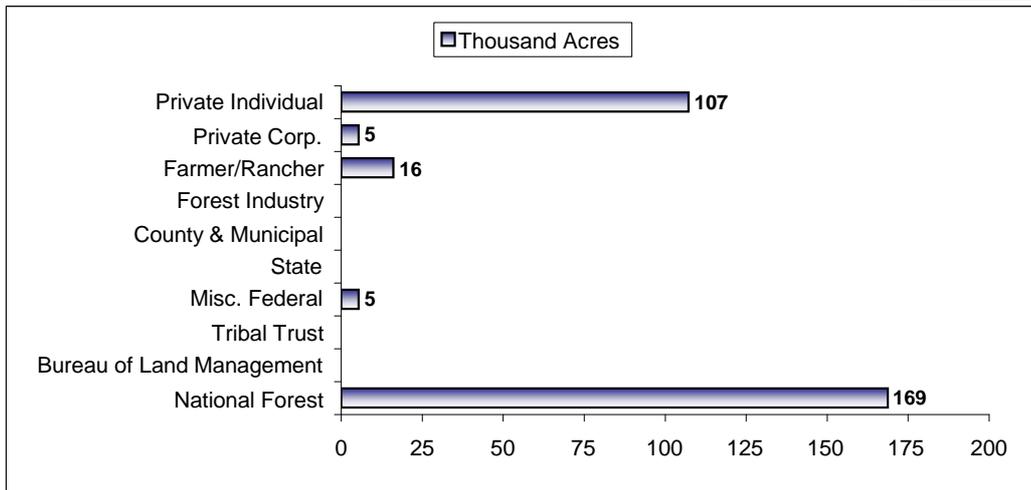

Source: Data provided by Dr. Frank Roth, Forester, Southwest Research and Extension Center, University of Arkansas, Hope, Arkansas

The value of harvested timber in Johnson County fluctuated between 1997 and 2000. Stumpage value rose from \$3.3 million in 1997 to \$5.5 million in 1998 and then declined to \$3.8 million in 2000.

Area of Timberland by Ownership Class, 1995
Johnson County

Figure 53

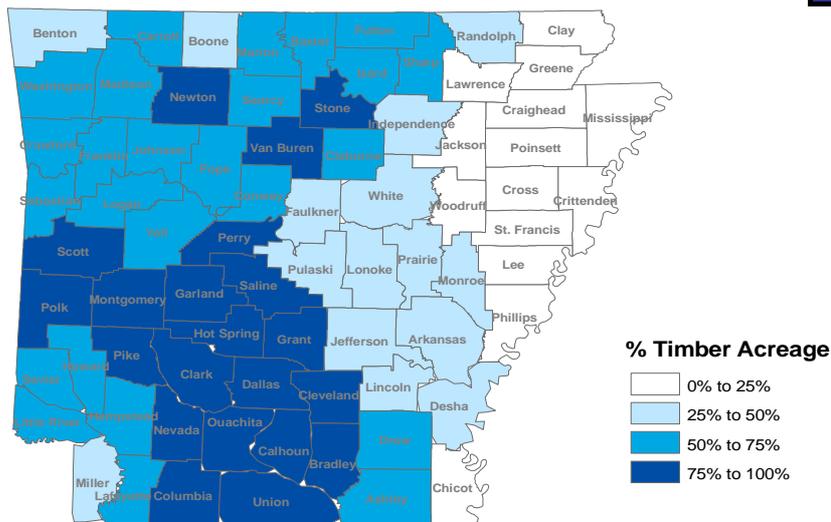

Source: Southern Forest Inventory & Analysis, Southern Research Station, Forest Service, USDA.

The total timber acreage in Johnson County is 302,700 acres. The national forest owns over half of the timberland in Johnson County.

Percent of Land in Forest By County, 1995
The Natural State

Figure 54

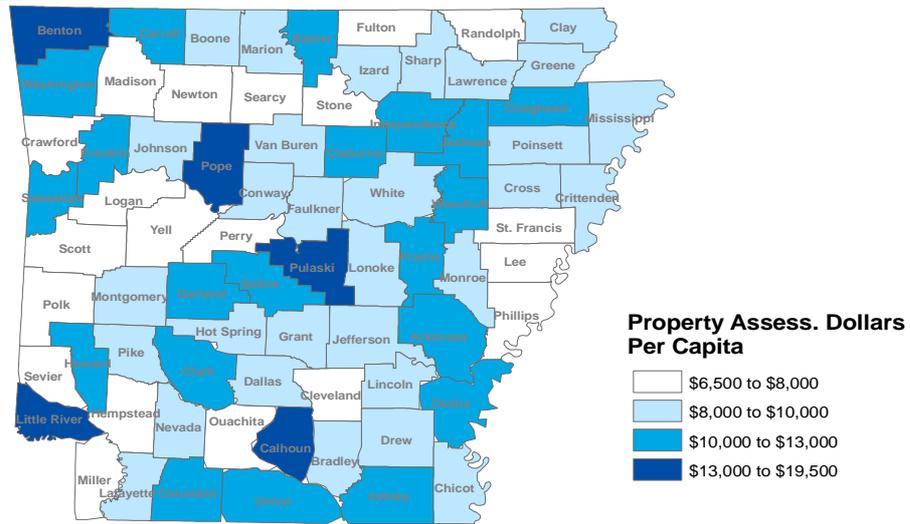

Source: Southern Forest Inventory & Analysis, Southern Research Station, Forest Service, USDA.

Over seventy-five percent of the land area in many Coastal Plain and Ouachita Highland counties qualifies as timber acreage.

Property Assessment & Roads

Property Assessments Per Person, 2003 *The Natural State*

Figure 55

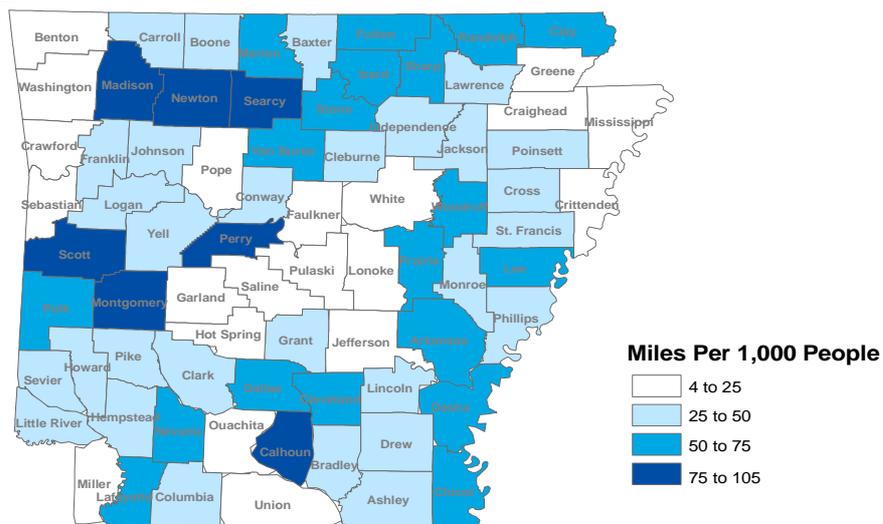

Source: Arkansas Assessment Coordination Department, Little Rock, Arkansas.

The average property assessments per person in 2003 vary greatly among Arkansas counties, from \$6,500 to \$19,500.

Miles of County Roads Per Person, 2000 *The Natural State*

Figure 56

Source: 44 Biennial Report, Arkansas State Highway Commission

In general, sparsely populated counties have more miles of county roads to maintain per person than more densely populated counties.

AGRICULTURAL SERVICES Includes establishments primarily engaged in performing soil preparation services, crop services, veterinary and other animal services, farm labor and management services, and landscape and horticultural services, for others on a contract or fee basis.

CIVILIAN LABOR FORCE The sum of all employed and unemployed persons 16 years of age or older. Members of the Armed Forces are excluded.

"CONSTANT \$" Figures adjusted for inflation using the Consumer Price Index, 1982-1984 = 100.

"CURRENT \$" Figures not adjusted for inflation.

CONSTRUCTION Includes general building contractors (residential, operative, and nonresidential); heavy construction contractors (highway, street, etc.); and special trade contractors (plumbing, heating, air conditioning, painting, paper hanging, electrical, masonry, stonework, roofing, sheet metal, concrete, and miscellaneous special trade contractors).

DELIVERED VALUE OF HARVESTED TIMBER The value of harvested timber delivered to the first processing point. The value includes the value of the timber (stumpage value), the cost of harvesting, and the cost of transporting the timber to the first processing point.

EARNINGS Earnings include wages and salaries, other labor income, and proprietors' income by place of work.

EMPLOYMENT An estimate of the number of persons, on a place-of-residence basis, who worked anytime for pay or profit or worked 15 hours or more as an unpaid family worker during the week of reference (the week including the 12th of the month). Also included are those who, although not working, had some job attachment and were not looking for work, and persons involved in labor-management disputes.

FAMILY HOUSEHOLDS Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family which is further classified into "male householder" (a family with a male householder and no wife present) or "female householder" (a family with a female householder and no husband present).

FARMING Includes businesses whose primary source of revenue is from crop and livestock production.

FEMALE HEADED FAMILIES A family with a female householder and no husband present.

FINANCIAL SERVICES Financial, insurance, and real estate services.

GOVERNMENT Employees of city, county, state and federal governments.

IMPUTED & MISC. INCOME RECEIVED Consists of imputed income, such as gross rental value of dwellings and value of home consumption, and other farm related income components, such as machine hire and custom work income, rental income, and income from forest products.

INCOME Total income is the algebraic sum of the amount reported separately for wage or salary income; non-farm net self-employment income; farm net self-employment income; interest, dividend, net royalty or rental income; social security or railroad retirement income; public assistance or welfare income and all other income.

INFANT MORTALITY RATE The number of infant deaths (under one year of age) per 1,000 live births.

JOBS The number of full-time and part-time jobs in a geographic area.

MANUFACTURING Includes manufacturing industries dealing with food and kindred products; textile mill products; apparel products; lumber and wood products; furniture and fixtures; paper and allied products; printing and publishing; chemicals; petroleum and coal; rubber and miscellaneous plastics; leather; stone, clay and glass; primary metal industries; fabricated metal products; machinery; electrical and electronic equipment; transportation equipment; instruments; and miscellaneous industries.

Glossary

MARKET VALUE OF AGRICULTURAL PRODUCTS SOLD The gross market value before taxes and production expenses of all agricultural products sold or removed from place regardless of who received payment. It includes sales by the operator as well as the value of any shares received by partners, landlords, contractors, or others associated with the operation. It does not include payment received for participation in federal farm programs nor does it include income from farm -related sources such as agricultural services, or income from non-farm sources.

MINING Includes extraction of oil and gas, non-metallic minerals, sand and gravel.

NET DOMESTIC MIGRATION The difference between domestic in-migration to an area and domestic out-migration from the area during the period.

PER CAPITA INCOME The per capita income is the total personal income divided by the total population of the area studied. The per capita income measure should be used with care. In the short run, it may temporarily vary from the result of unusual conditions (bumper crops, a major construction project or a catastrophe). In the long run, it may misrepresent the economic well-being of the general population because of the presence of a large institutional population (college, prison). While per capita income reflects average income per person, it does not accurately reflect family unit spendable income.

PERSONAL INCOME The total income received by residents of an area, including earnings, transfer payments, and interest, dividends and rent.

POVERTY LEVEL An individual or household is considered to be living below the poverty level when their income is below an income threshold established by the Bureau of Census. The income cutoffs used by the Bureau of Census to determine the poverty status of families and unrelated individuals consist of a set of 48 thresholds arranged in a two-dimensional matrix consisting of family size cross-classified by presence and number of family members under 18 years old.

RETAIL SALES Includes sales from general merchandise stores; department stores; variety stores; food, bakery and dairy stores; automotive dealers; gasoline stations; eating and drinking establishments; and other retail trade establishments.

SINGLE HEAD OF FAMILY Single head of a family with no spouse present.

SERVICES Includes a variety of items ranging from hotels to attorneys.
