

Outdoor Water Efficiency Tips

Landscape

- Water infrequent and deep to encourage deep root growth. Deep roots = healthy plants.
- Best time to water is early morning before sunrise. Avoid mid-day and night watering.

Sprinkler Systems

- Avoid water runoff on slopes by breaking your run times in halves.
- Let your landscapes tell you when to water. Look for drought symptoms.
- Occasionally check your sprinkler system pattern to ensure full coverage of your landscape.

Central Arkansas Sprinkler Smart

www.carkw.com or www.uaex.edu

What the program can do for you:

- **Free Public Workshops** on how to be more efficient with outdoor watering and the latest in sprinkler technology.
- **Free Programs** for your civic group, property owners association or event.
- **Water efficiency site visit** for homeowners and businesses.
