Notes: A large block Liberty Link Cotton Variety Demonstration was conducted on the David Cagle farm. Three varieties were planted and 72 rows 1227 feet long or 6.42 acres of each variety were harvested and ginned separately. The varieties were FiberMax 1944, Stoneville 4936 and Stoneville 4747.

These are non-replicated demonstration plots. For a better picture of a varieties potential, growers are encouraged to compare this data with data collected from University of Arkansas System Division of Agriculture replicated tests. This research data is printed annually and is available on-line at http://arkansasvarietytesting.com/
