Faulkner County Master Gardener Program

What will the Master Gardener program do for me?

- Provide continuing education in horticulture topics/issues.
- Provide hands-on practical and advanced gardening experience.
- Provide the opportunity to make my community more attractive and eco-friendly.
- Provide opportunities for fellowship with other gardeners.

What will I do for the Master Gardener program?

- Become a qualified representative of the organization and the University of Arkansas Extension Service through my volunteer commitment.
- Become an advocate for good gardening practices in our group projects as well as in my own garden.
- Promote eco-friendly landscape design and garden maintenance by example in our Master Gardener landscape projects.
- Share the knowledge and experience I’ve gained as a Master Gardener to others (individually and in groups) in our community.
