The mission of 4-H is to provide opportunities for youth to acquire knowledge, develop life skills, form attitudes, and practice behavior that will enable them to become self-directing, productive, and contributing members of society.

I pledge:

My Head to clearer thinking,
My Heart to greater loyalty,
My Hands to larger service,
My Health to better living for my club, my community, my country, and my world.

All meetings are open to all youth between the ages of 5 and 19 without regard to race, color, national origin, religion, gender, disability, or any other legal protected status. Persons with disabilities who require alternative means for communication of program information (large print, audiotapes, etc.) should notify the county Extension Office as soon as possible prior to the activity.
Lonoke County 4-H offers a variety of school enrichment programs that are tied to Arkansas Educational Frameworks. Teachers can pick a program that interests them and their students, and the County Extension Agent will come and conduct the lesson and activity.

Money Talks
Money Talks for Teens is a money management curriculum aimed at teens 14-18 years old. The materials provide teens accurate, non-biased information and hands-on experiences in financial management. The Money Talks curriculum is composed of 15 units divided into 4 modules: Should I be listening?, Should I be Banking?, Should I be Charging?, Should I be Working?.

Project WET, WILD, and Learning Tree
WET: A water science and education program that helps to inspire students to respect precious water resources and to understand the importance of both sound water management and their personal commitment to environmental protection. WILD: An education program rooted in nature that helps educators bring the outdoors to their students with a focus on wildlife. Learning Tree: PLT uses the forest as a "window" on the world to increase students' understanding of our environment; stimulate students' critical and creative thinking; develop students' ability to make informed decisions on environmental issues; and instill in students the commitment to take responsible action on behalf of the environment.

Healthy Lifestyles
A health program focused on middle school aged students that addresses the five leading youth-risk behaviors with topics such as conflict resolution, nutrition, fitness, safety, and substance abuse prevention.

Yoga for Kids
Yoga allows students to get up and get moving, but relax at the same time. In pilot programs, youth had better focus in class after beginning the day with a 20 minute yoga session. If interested in a yoga program, contact the County Agent about doing a trial program in your classroom, working with your schedule.

Embryology
Students can learn about eggs and incubation while watching the process before their eyes. Lessons will cover the structure and functions of living systems, reproduction and heredity, and regulation and behavior.

Outdoor Garden
This program uses activities to further student's education on gardening with gardens and greenhouses. Grants may also be obtained to help start a program.

Ag in the Classroom
Agriculture in the Classroom is a program that seeks to improve agricultural literacy — awareness, knowledge, and appreciation — among students. Activities vary among age levels but include information on crops, livestock, production agriculture, agriculture business, and agriculture career opportunities.

4-H Science & STEM
STEM is a program that focuses on Science, Technology, Engineering and Math in a hands-on format. The National STEM program has a goal to prepare the next generation of leaders in the science fields.

Citizenship & Leadership
This program teaches youth about citizenship in their community, country and in today's world. Team building activities are also included to teach you teamwork and leadership skills.
