For more information, contact Dr. Shaun M. Tanger, at 225-578-0344 or by email at: stanger@agcenter.lsu.edu

Registration Deadline: November 25th, 2016

This course provides essential tools and resources that help woodland owners make the decisions necessary to achieve their objectives and pass their land to succeeding generations. Through the use of workbook activities, videos and lectures we assist woodland owners in addressing communication, emotional and legal aspects of successions planning.

Good succession planning is a way of building shared vision and passion for the land among the current owners and heirs. The diversity of family members in their values, goals and skill can be used to form an effective succession plan to keep land in the family or identify alternative paths.

This award winning course was developed and is supported by Oregon State University.
