Investment Options

Here is a comprehensive list of investment options for the University of Arkansas. For up-to-date performance information and other fund specifics, go to www.fidelity.com/atwork.

Lifecycle Funds

Placement of investment options within each risk spectrum is only in relation to the investment options within that specific spectrum. Placement does not reflect risk relative to the investment options shown in the other risk spectrums.

For each risk spectrum below, investment options to the left have potentially more inflation risk and less investment risk. For each risk spectrum below, investment options to the right have potentially less inflation risk and more investment risk.

Target date investments are represented on a separate spectrum because they are generally designed for investors expecting to retire around the year indicated in each investment’s name. The investments are managed to gradually become more conservative over time. The investment risks of each target date investment change over time as its asset allocation changes. They are subject to the volatility of the financial markets, including equity and fixed income investments in the U.S. and abroad and may be subject to risks associated with investing in high yield, small cap and foreign securities. Principal invested is not guaranteed at any time, including at or after their target dates.
The chart below lists the assigned fund the University of Arkansas believes will best fit your diversification needs should you not select an investment option.

The portfolio manager of each of the Fidelity Asset Manager® funds has the flexibility to periodically shift investments among the three asset classes (stock, bond, short-term investments), depending on the current outlook for the various markets. The risk level of the Fidelity Asset Manager® funds cannot be portrayed as a single point on the objective spectrum along with the other investment options because they may change periodically according to how the assets are invested. Placement of each Fidelity Asset Manager® fund on this spectrum is in relation to the other Fidelity Asset Manager® funds, which have different investment strategies.

This spectrum, with the exception of the Domestic Equity category, is based on Fidelity’s analysis of the characteristics of the general investment categories of the investment options and not on the actual security holdings, which can change frequently. Investment options in the Domestic Equity category are based on the options’ Morningstar categories as of 12/31/2012. Morningstar categories are based on a fund’s style as measured by its underlying portfolio holdings over the past three years and may change at any time. These style calculations do not represent the investment options’ objectives and do not predict the investment options’ future styles. Investment options are listed in alphabetical order within each investment category. Risk associated with the investment options can vary significantly within each particular investment category, and the relative risk of categories may change under certain economic conditions. For a more complete discussion of risk associated with the mutual fund options, please read the prospectuses before making your investment decision. The spectrum does not represent actual or implied performance.

Investment Options

Before investing in any investment option, please carefully consider the investment objectives, risks, charges and expenses. For this and other information, call Fidelity at 1-800-343-0860 or visit www.fidelity.com/atwork for a free mutual fund or variable annuity prospectus or, if available, a summary prospectus. For information on fixed annuities, contact Fidelity to request a fact sheet. Read them carefully before you invest.

Fidelity Asset Manager®  20%

VRS Code: 00328

Fund Objective: Seeks a high level of current income by allocating its assets among stocks, bonds, short-term instruments and other investments. The fund also considers the potential for capital appreciation (may be changed without shareholder vote).

Fund Strategy: Maintaining a neutral mix over time of 20% of assets in stocks, 50% of assets in bonds, and 30% of assets in short-term and money market instruments though FMR may overweight or underweight each asset class. Allocating the fund’s assets among stocks, bonds, and short-term and money market instruments, either through direct investment or by investing in Fidelity central funds that hold such investments.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer or counterparty default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks all of which are magnified in emerging markets. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Leverage can increase market exposure and magnify investment risks.

Fund short term trading fees: None

Footnotes:
• A mutual fund registered under Fidelity Charles Street Trust, and managed by Fidelity Management Research Company (“FMR”). This description is only intended to provide a brief overview of the fund. Read the fund’s prospectus for more detailed information about the fund.

Fidelity Emerging Markets Discovery Fund

VRS Code: 02374

Fund Objective: Seeks capital appreciation.

Fund Strategy: Focus on investing in smaller capitalization companies exposed to secular growth trends of ascendant emerging market domestic economies. Normally investing at least 80% of assets in securities of issuers in emerging markets (countries that have an emerging stock market as defined by MSCI, countries or markets with low- to middle-income economies as classified by the World Bank, and other countries or markets with similar emerging characteristics) and other investments that are tied economically to emerging markets. Normally investing primarily in common stocks. Investing in either “growth” stocks or “value” stocks or both. Allocating investments across different emerging market countries. Using fundamental analysis of factors such as each issuer’s financial condition and industry position, as well as market and economic conditions to select investments.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. The securities of smaller, less well-known companies can be more volatile than those of larger companies. The fund may have additional volatility because it can invest a significant portion of assets in securities of a small number of individual issuers.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 2.00% for shares held less than 90 days.

Footnotes:
- A mutual fund registered under Fidelity Investment Trust, and managed by Fidelity Management Research Company (“FMR”). This description is only intended to provide a brief overview of the fund. Read the fund’s prospectus for more detailed information about the fund.
- Fidelity is voluntarily reimbursing a portion of the fund’s expenses. If Fidelity had not, the returns would have been lower.

Fidelity Fifty®

VRS Code: 00500

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally investing in 50-60 stocks. Normally investing primarily in common stocks of companies that FMR believes have the greatest potential for growth. Investing in either “growth” stocks or “value” stocks or both.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The fund may have additional volatility because it can invest a significant portion of assets in securities of a small number of individual issuers.

Fidelity Freedom K® 2000 Fund

VRS Code: 02172

Fund Objective: Seeks high total return until its target retirement date. Thereafter, the fund’s objective will be to seek high current income and, as a secondary objective, capital appreciation.

Fund Strategy: Investing in a combination of underlying Fidelity domestic equity, international equity, bond, and short-term funds using a moderate asset allocation strategy designed for investors expected to have retired around the year 2000. Allocating assets among underlying Fidelity funds according to an asset allocation strategy that becomes increasingly conservative until it reaches approximately 15% in domestic equity funds, 5% in international equity funds, 40% in bond funds, and 40% in short-term funds (approximately 10 to 15 years after the year 2000). Ultimately, the fund will merge with Fidelity Freedom K Income Fund.

Fund Risk: The investment risk of each Fidelity Freedom K Fund changes over time as its asset allocation changes. The funds are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and maybe subject to risks associated with investing in high-yield, small-cap, commodity-linked, and foreign securities. Principal invested is not guaranteed at any time, including at or after the funds’ target dates.

Fund short term trading fees: None

VRS Code: 02174

Fund Objective: Seeks high total return until its target retirement date. Thereafter, the fund’s objective will be to seek high current income and, as a secondary objective, capital appreciation.

Fund Strategy: Investing in a combination of underlying Fidelity domestic equity, international equity, bond, and short-term funds using a moderate asset allocation strategy designed for investors expected to have retired around the year 2010. Allocating assets among underlying Fidelity funds according to an asset allocation strategy that becomes increasingly conservative until it reaches approximately 15% in domestic equity funds, 5% in international equity funds, 40% in bond funds, and 40% in short-term funds (approximately 10 to 15 years after the year 2010). Ultimately, the fund will merge with Fidelity Freedom K Income Fund.

Fund Risk: The investment risk of each Fidelity Freedom K Fund changes over time as its asset allocation changes. The funds are subject to the volatility of the financial markets, including that of equity and fixed income investments in the U.S. and abroad, and may be subject to risks associated with investing in high-yield, small-cap, commodity-linked, and foreign securities. Principal invested is not guaranteed at any time, including at or after the funds’ target dates.

Fund short term trading fees: None

Fidelity® Emerging Asia Fund
VRS Code: 00351
Fund Objective: Seeks capital appreciation.
Fund Strategy: Normally investing at least 80% of assets in securities of companies with large market capitalizations (companies with market capitalizations similar to companies in the Russell 1000 Index or the S&P 500 Index). Normally targeting long positions of 130% of its net assets, and short positions of 30% of its net assets. Investing in either “growth” stocks or “value” stocks or both. Normally investing primarily in common stocks.
Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. The risks are particularly significant for funds that focus on a single country or region.

Fidelity® 130/30 Large Cap Fund
VRS Code: 02063
Fund Objective: Seeks long-term growth of capital.
Fund Strategy: Normally investing at least 80% of assets in securities of companies with large market capitalizations (companies with market capitalizations similar to companies in the Russell 1000 Index or the S&P 500 Index). Normally targeting long positions of 130% of its net assets, and short positions of 30% of its net assets. Investing in either “growth” stocks or “value” stocks or both. Normally investing primarily in common stocks. Investing in domestic and foreign issuers.
Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Short positions pose a risk because they lose value as a security’s price increases; therefore, the loss on a short sale is theoretically unlimited. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) that may increase market exposure, magnify investment risks, and cause losses to be realized more quickly.

Fidelity® Cash Reserves  
VRS Code: 00055

**Fund Objective:** Seeks as high a level of current income as is consistent with the preservation of capital and liquidity.

**Fund Strategy:** Investing in U.S. dollar-denominated money market securities of domestic and foreign issuers and repurchase agreements. Investing more than 25% of total assets in the financial services industries. Potentially entering into reverse repurchase agreements.

**Fund Risk:** An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at $1.00 per share, it is possible to lose money by investing in the fund. Interest rate increases can cause the price of money market securities to decrease. Entities located in foreign countries can be affected by adverse political, regulatory, market, or economic developments in those countries. Changes in government regulation and interest rates and economic downturns can have a significant negative effect on issuers in the financial services sector.

Normally maintaining a dollar-weighted average maturity of 0.75 years or less. Investing up to 5% in lower quality investment-grade securities and potentially investing in reverse repurchase agreements. Investing more than 25% of total assets in the financial services industries. Investing in both domestic and foreign issuers.

**Fund Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities can be more volatile than U.S. markets due to increased risks of adverse issuer, political, regulatory, market or economic developments. Changes in government regulation, interest rates and economic downturns can have a significant effect on issuers in the financial services sector, including the price of their securities or their ability to meet their payment obligations. Prepayment of principal prior to a security’s maturity can cause greater price volatility if interest rates change. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) which may increase market exposure, magnify investment risks, and cause losses to be realized more quickly. The fund is not a moneymarket fund and will have a fluctuating NAV.

Fidelity® Contrafund® - Class K
VRS Code: 02080

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing in securities of companies whose value FMR believes is not fully recognized by the public. Investing in either ‘growth’ stocks or ‘value’ stocks or both. Normally investing primarily in common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to the activities of individual companies, and general market and economic conditions. Investments in foreign securities involve greater risk than U.S. investments. You may have a gain or loss when you sell your shares.

Fidelity® Convertible Securities Fund
VRS Code: 00308

Fund Objective: Seeks a high level of total return through a combination of current income and capital appreciation.

Fund Strategy: Normally investing at least 80% of assets in convertible securities, which are often lower-quality debt securities and perform more like a stock when the underlying share price is high and more like a bond when the underlying share price is low. Potentially investing in other types of securities, including common stocks.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise, bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks.

Fidelity® Corporate Bond Fund
VRS Code: 02208

Fund Objective: Seeks a high level of current income.

Fund Strategy: Normally investing at least 80% of assets in investment-grade corporate bonds and other corporate debt securities and repurchase agreements for those securities. Potentially investing in lower-quality debt securities. Engaging in transactions that have a leveraging effect on the fund, including derivatives.

Fund Risk: In general the bond market is volatile, and bond funds entail interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Bond funds also entail the risk of issuer or counterparty default, issuer credit risk, and inflation risk. The fund may invest in lower-quality debt securities that involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Foreign securities are subject to interest rate, currency-exchange-rate, economic, and political risks. Investments in mortgage securities are subject to the risk that principal will be repaid prior to maturity. As a result, when interest rates decline, gains may be reduced, and when interest rates rise, losses may be greater. Leverage can increase market exposure, magnify investment risks, and cause losses to be realized more quickly.

Fidelity® Emerging Europe, Middle East, Africa (EMEA) Fund
VRS Code: 02053

**Fund Objective:** Seeks capital appreciation.

**Fund Strategy:** Normally investing at least 80% of assets in securities of emerging Europe, Middle East and Africa (EMEA) issuers and other investments that are tied economically to the EMEA region. Normally investing up to 35% of total assets in any industry that accounts for more than 20% of the EMEA market. Normally investing primarily in common stocks.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. The risks are particularly significant for funds that focus on a single country or region. Fidelity® Four-in-One Index Fund
VRS Code: 00355
Fund Objective: Seeks high total return.
Fund Strategy: Investing in a combination of four Fidelity stock and bond index funds (underlying Fidelity funds) using an asset allocation strategy designed for investors seeking a broadly diversified, index-based investment.
Fund Risk: Many factors affect Four-in-One Index's performance. Four-in-One Index's share price changes daily based on the performance of the underlying Fidelity funds in which it invests. The ability of Four-in-One Index to meet its investment objective is directly related to its target asset allocation among the underlying Fidelity funds and the ability of those funds to meet their investment objectives. The following factors can significantly affect Four-in-One Index's performance: stock market volatility, interest rate change, foreign exposure including exposure to emerging markets, prepayment, issuer specific changes, and small cap investing.

**Fund Strategy:** Normally investing primarily in income producing debt securities, preferred stocks, and convertible securities, with an emphasis on lower-quality debt securities, of U.S. and non-U.S. issuers, including emerging market countries. Potentially investing in non-income producing securities, including defaulted securities and common stocks. Investing in companies in troubled or uncertain financial condition. Allocating investments across different countries and regions. Investing in securities issued anywhere in the world, including potentially significant investments in U.S. issuers. Using a base neutral mix of approximately 60% U.S. high yield, 20% emerging markets debt, 15% European high yield, and 5% Asian high yield. Adjusting allocation among markets within the following ranges: U.S. high yield (40%-80%); emerging markets debt (5%-35%); European high yield (0%-30%); and Asian high yield (0%-10%). Analyzing an issuer using fundamental factors (e.g., financial condition, earnings outlook, and strategy) and evaluating each security's current price relative to estimated long-term value to select investments.

**Fund Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to currency-exchange-rate, economic, and political risks, all of which are magnified in emerging markets.

**Fund short term trading fees:** This fund has a Short-term Redemption Fee of 1.00% for shares held less than 90 days.

**Fidelity® Global Strategies Fund**

**VRS Code:** 01960

**Fund Objective:** Seeks to maximize total return.

**Fund Strategy:** Allocate the funds assets between stocks and bonds of all types, as well as non-traditional asset classes such as commodity-related investments, based anywhere in the world by investing in Fidelity funds (underlying Fidelity funds) and unaffiliated exchange traded funds (ETFs), or through direct investments. Utilize a combination of economic research, technical analysis, quantitative analysis and fundamental research to arrive at allocation decisions. Adjust allocations among asset classes to take advantage of short-term market opportunities and strategic, longer-term opportunities.
**Fund Risk:** The fund is subject to asset allocation risk and the risks of the underlying funds in which it invests. Those risks include the volatility of the financial markets in the U.S. and abroad as well as those risks associated with debt securities or bonds. Foreign markets may be more volatile than U.S. markets due to interest-rate, currency-exchange-rate, economic, and political risks. In general, the bond market is volatile and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) The value of commodities and commodity-linked investments may be affected by the performance of the overall commodities markets as well as weather, political, tax, and other regulatory and market developments. If the fund’s asset allocation strategy does not work as intended, the fund may not achieve its objective.

**VRS Code:** 00763

**Fund Objective:** The fund seeks long-term growth of capital.

**Fund Strategy:** Normally investing at least 80% of assets in securities of companies with large market capitalizations (those companies with market capitalizations similar to companies in the Russell 1000 Index or the Standard & Poor’s 500 Index (S&P 500)). Investing in companies that FMR believes have above-average growth potential (stocks of these companies are often called “growth” stocks). Normally investing primarily in common stocks.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.

**Fund short term trading fees:** None

Fidelity® Large Cap Value Enhanced Index Fund  
VRS Code: 01828  
Fund Objective: Seeks capital appreciation.  
Fund Strategy: Normally investing at least 80% of assets in common stocks included in the Russell 1000 Value Index, which is a market capitalization-weighted index of companies with large market capitalizations. Generally using computer-aided, quantitative analysis to select stocks that may have the potential to provide a higher total return than that of the Russell 1000 Value Index.  
Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Although the fund seeks to beat the index, this is not guaranteed and the fund may trail the index.  
Fund short term trading fees: None

Fidelity® Latin America Fund  
VRS Code: 00349  
Fund Objective: Seeks long-term growth of capital.  
Fund Strategy: Normally investing at least 80% of assets in securities of Latin American issuers and other investments that are tied economically to Latin America. Investing up to 35% of total assets in any industry that accounts for more than 20% of the Latin American market. Normally investing primarily in common stocks.  
Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. The risks are particularly significant for funds that focus on a single country or region. The fund may have additional volatility because it can invest a significant portion of assets in securities of a small number of individual issuers.  
Fund short term trading fees: This fund has a Short-term Redemption Fee of 1.50% for shares held less than 90 days.
Fidelity® Leveraged Company Stock Fund - Class K

VRS Code: 02094

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally invests at least 80% of assets in common stocks of leveraged companies (companies that issue lower-quality debt and other companies with leveraged capital structures). The fund may invest in lower-quality debt securities. Invests in domestic and foreign issuers. In either ‘growth’ stocks or ‘value’ stocks or both.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Leverage can magnify the impact of adverse issuer, political, regulatory, market, or economic developments on a company. In the event of bankruptcy, a company’s creditors take precedence over the company’s stockholders. Although the companies that the fund invests in may be highly leveraged, the fund itself does not use leverage as an investment strategy.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 1.50% for shares held less than 90 days.

Footnotes:

- On May 9, 2008, an initial offering of the retirement (K) class took place. Returns and expenses prior to that date are those of the non-K, non-advisor class. Had K class expenses been reflected in the returns shown, total returns would have been higher.

Fidelity® Low-Priced Stock Fund - Class K

VRS Code: 02095

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally invests primarily in common stocks. Normally investing at least 80% of assets in low-priced stocks (those priced at or below $35 per share), which can lead to investments in small and medium-sized companies. Potentially investing in stocks not considered low-priced. Investing in domestic and foreign issuers. Investing in either ‘growth’ or ‘value’ stocks or both.

Fund Risk: Stock values fluctuate in response to the activities of individual companies, and general market and economic conditions. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market. You may have a gain or loss when you sell your shares. The securities of small, less well-known companies may be more volatile than those of larger companies. Investments in foreign securities involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 1.50% for shares held less than 90 days.

Fidelity® Magellan® Fund - Class K

VRS Code: 02096

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally investing primarily in common stocks. Investing in either “growth” stocks or “value” stocks or both.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks.

Fund short term trading fees: None
Fidelity® Mega Cap Stock Fund

VRS Code: 00361

Fund Objective: Seeks high total return through a combination of current income and capital appreciation.

Fund Strategy: Normally investing at least 80% of assets in common stocks of companies with mega market capitalizations (companies with market capitalizations similar to companies in the Russell Top 200 Index or the S&P 100). Investing in either “growth” stocks or “value” stocks or both.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks.

Fund short term trading fees: None

Fidelity® Mid Cap Enhanced Index Fund

VRS Code: 02012

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally investing at least 80% of assets in common stocks included in the Russell MidCap Index, which is a market capitalization-weighted index of companies with medium market capitalizations. Generally using computer-aided, quantitative analysis to select stocks that may have the potential to provide a higher total return than that of the Russell MidCap Index.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Although the fund seeks to beat the index, this is not guaranteed and the fund may trail the index.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

Fidelity® Mid Cap Value Fund

VRS Code: 00762

Fund Objective: The fund seeks long-term growth of capital.

Fund Strategy: Normally investing at least 80% of assets in common stocks of companies with medium market capitalizations (those companies with market capitalizations similar to companies in the Russell Midcap Index or the Standard & Poor’s MidCap 400 Index (S&P MidCap 400)). Investing in securities of companies that FMR believes are undervalued in the marketplace in relation to factors such as assets, sales, earnings, growth potential, or cash flow, or in relation to securities of other companies in the same industry (stocks of these companies are often called “value” stocks). Normally investing primarily in common stocks.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Value stocks can perform differently from other types of stocks and can continue to be undervalued by the market for long periods of time.

Fidelity® Mid-Cap Stock Fund - Class K

VRS Code: 02097

Fund Objective: Seeks long-term growth of capital.

Fund Strategy: Normally investing at least 80% of assets in common stocks of companies with medium market capitalizations (companies with market capitalization similar to companies in the Russell Midcap Index or the S&P MidCap 400). Investing in either “growth” stocks or “value” stocks or both. Potentially investing in companies with smaller or larger market capitalization.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fidelity® Money Market Fund

VRS Code: 00454

Fund Objective: Seeks as high a level of current income as is consistent with preservation of capital and liquidity.

Fund Strategy: Investing in U.S. dollar-denominated money market securities of domestic and foreign issuers and repurchase agreements. Investing more than 25% of total assets in the financial services industries. Potentially entering into reverse repurchase agreements.

Fund Risk: An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at $1.00 per share, it is possible to lose money by investing in the fund. Interest rate increases can cause the price of a money market security to decrease.

Fund short term trading fees: None

Fidelity® Money Market Trust Retirement Government Money Market Portfolio
VRS Code: 00040
Fund Objective: Seeks a high level of current income, consistent with prudent investment risk. In seeking current income, the fund may also consider the potential for capital gain.
Fund Strategy: Normally investing at least 80% of assets in investment-grade mortgage-related securities (those of medium and high quality) and repurchase agreements for those securities. Engaging in transactions that have a leveraging effect on the fund.
Fund Risk: Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Mortgage securities are subject to prepayment risk, which can limit gains due to declining interest rates, and increase losses due to rising rates. Leverage can increase market exposure and magnify investment risk.

Fidelity® Real Estate Income Fund
VRS Code: 00833
Fund Objective: Seeks higher than average income. As a secondary objective, the fund also seeks capital growth.
Fund Strategy: Normally investing at least 80% of assets in securities of companies principally engaged in the real estate industry and other real estate related investments. Normally investing primarily in preferred and common stocks of real estate investment trusts (REITs), debt securities of real estate entities; and commercial and other mortgage-backed securities, with an emphasis on lower-quality debt securities.
Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry.

### Fidelity® Short-Term Bond Fund

**VRS Code:** 00450  
**Fund Objective:** Seeks to obtain a high level of current income consistent with preservation of capital.  
**Fund Strategy:** Normally investing at least 80% of assets in investment-grade debt securities (those of medium and high quality) of all types and repurchase agreements for those securities. Normally maintaining a dollar-weighted average maturity between three years or less. Engaging in transactions that have a leveraging effect on the fund.  
**Fund Risk:** Bond funds entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Leverage can increase market exposure and magnify investment risk.  
**Fund short term trading fees:** None  

**Footnotes:**  
- A mutual fund registered under Fidelity Salem Street Trust, and managed by Fidelity Management Research Company (“FMR”). This description is only intended to provide a brief overview of the fund. Read the fund’s prospectus for more detailed information about the fund.

### Fidelity® Small Cap Discovery Fund

**VRS Code:** 00384  
**Fund Objective:** Seeks long-term growth of capital.  
**Fund Strategy:** Normally investing at least 80% of assets in securities of companies with small market capitalizations (companies with market capitalizations similar to the companies in the Russell 2000 Index or the S&P Small Cap 600). Investing in either “growth” stocks or “value” stocks or both. Normally investing primarily in common stocks.  
**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks.  
**Fund short term trading fees:** This fund has a Short-term Redemption Fee of 1.50% for shares held less than 90 days.
Fidelity® Small Cap Enhanced Index Fund

VRS Code: 02011

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally investing at least 80% of assets in common stocks included in the Russell 2000 Index, which is a market capitalization-weighted index of companies with small market capitalizations. Generally using computer-aided, quantitative analysis to select stocks that may have the potential to provide a higher total return than that of the Russell 2000 Index.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Although the fund seeks to beat the index, this is not guaranteed and the fund may trail the index.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 1.50% for shares held less than 90 days.

Fidelity® Small Cap Growth Fund

VRS Code: 01388

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally investing at least 80% of assets in securities of companies with small market capitalizations (companies with market capitalizations similar to companies in the Russell 2000 Index or the Standard & Poor's Small Cap 600 Index). Investing in companies that FMR believes have above-average growth potential (stocks of these companies are often called ‘growth’ stocks). Normally investing primarily in common stocks.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 1.50% for shares held less than 90 days.

**Fidelity® Small Cap Value Fund**

**VRS Code:** 01389

**Fund Objective:** Seeks capital appreciation.

**Fund Strategy:** Normally investing at least 80% of assets in securities of companies with small market capitalizations (companies with market capitalizations similar to companies in the Russell 2000 Index or the Standard & Poor’s Small Cap 600 Index). Investing in securities of companies that FMR believes are undervalued in the marketplace in relation to factors such as assets, sales, earnings, growth potential, or cash flow, or in relation to securities of other companies in the same industry (stocks of those companies are often called “value” stocks). Normally investing primarily in common stocks.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The securities of smaller, less well-known companies can be more volatile than those of larger companies. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time.

**Fidelity® Stock Selector Large Cap Value Fund**

**VRS Code:** 00708

**Fund Objective:** Seeks long-term growth of capital.

**Fund Strategy:** Normally investing at least 80% of assets in stocks of companies with large market capitalizations (those companies with market capitalizations similar to companies in the Russell 1000 Index or the S&P 500 Index). Investing in securities of companies that FMR believes are undervalued in the marketplace in relation to factors such as assets, sales, earnings, growth potential, or cash flow, or in relation to securities of other companies in the same industry (stocks of these companies are often called “value” stocks). Investing in domestic and foreign issuers. Allocating the fund’s assets across different market sectors (at present, consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecom services, and utilities), using different Fidelity managers.

**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Value stocks can perform differently from other types of stocks and can continue to be undervalued by the market for long periods of time. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks.

● As of September 1, 2010, this fund changed its name from Fidelity Small Cap Independence Fund.

Fidelity® Strategic Dividend & Income® Fund  
VRS Code: 01329

Fund Objective: Seeks reasonable income. The fund will also consider the potential for capital appreciation.

Fund Strategy: Normally investing at least 80% of assets in equity securities. Using a neutral mix of approximately 50% common stocks, 15% REITs and other real estate related investments, 15% convertible securities, and 20% preferred stocks. Investing the fund's assets with a focus on equity securities that pay current dividends and show potential for capital appreciation, which tends to lead to investments in "value" stocks in the common stock category.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time.

Fund short term trading fees: None

Fidelity® Strategic Income Fund  
VRS Code: 00368  
**Fund Objective:** Seeks a high level of current income. The fund may also seek capital appreciation.  
**Fund Strategy:** Investing primarily in debt securities by allocating assets among four general investment categories: high yield securities, U.S. Government and investment-grade securities, emerging market securities, and foreign developed market securities. The fund uses a neutral mix of approximately 40% high yield, 30% U.S. Government and investment-grade, 15% emerging markets, and 15% foreign developed markets. Engaging in transactions that have a leveraging effect on the fund.  
**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Fixed income investments entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Leverage can increase market exposure and magnify investment risk.  
**Fund short term trading fees:** None

Fidelity® Strategic Real Return Fund  
VRS Code: 01505  
**Fund Objective:** Seeks real return consistent with reasonable investment risk.  
**Fund Strategy:** Allocating the fund’s assets among four general investment categories, using a neutral mix of approximately 30% inflation-protected debt securities, 25% floating-rate loans, 25% commodity-linked notes and related investments, and 20% REITs and other real estate related investments. Engaging in transactions that have a leveraging effect on the fund.  
**Fund Risk:** Stock markets, particularly foreign markets, are volatile and can be affected by adverse issuer, political, regulatory, market, or economic developments. Floating rate loans may not be fully collateralized and therefore may decline significantly in value. A floating rate loan may not be fully collateralized which may cause the loan to decline significantly in value. A floating rate loan is generally subject to restrictions on resale. Difficulty in selling a floating rate loan may result in a loss. Interest rate increases can cause the price of a debt security to decrease. Increases in real interest rates can cause the price of inflation-protected debt securities to decrease. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Commodity-linked investments can be more volatile and less liquid than the underlying instruments or measures and their value may be affected by the performance of the overall commodities baskets as well as weather, tax, and other regulatory developments. Leverage can increase market exposure and magnify investment risks.  
**Fund short term trading fees:** This fund has a Short-term Redemption Fee of 0.75% for shares held less than 60 days.  
**Footnotes:**

Fidelity® Telecom and Utilities Fund  
VRS Code: 00311  
**Fund Objective:** Seeks high total return through a combination of current income and capital appreciation.  
**Fund Strategy:** Normally investing at least 80% of assets in securities of utility companies. Normally investing in common stocks.  
**Fund Risk:** Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. The utilities industries can be significantly affected by government regulation, financing difficulties, supply and demand of services or fuel, and natural resource conservation. Non-diversified funds that focus on a relatively small number of stocks tend to be more volatile than diversified funds and the market as a whole.  
**Fund short term trading fees:** None
Fidelity® Total Bond Fund
VRS Code: 00820

Fund Objective: Seeks a high level of current income.

Fund Strategy: Normally investing at least 80% of assets in debt securities of all types and repurchase agreements for those securities. Investing up to 20% of assets in high yield and emerging market debt securities. Engaging in transactions that have a leveraging effect on the fund.

Fund Risk: Bond funds entail interest rate risk (as interest rates rise bond prices usually fall), the risk of issuer default, issuer credit risk and inflation risk. Lower-quality bonds can be more volatile and have greater risk of default than higher-quality bonds. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Leverage can increase market exposure and magnify investment risk.

Fidelity® Total International Equity Fund
VRS Code: 01978

Fund Objective: Seeks long-term growth of capital.

Fund Strategy: Normally investing primarily in non-U.S. securities, including securities of issuers located in emerging markets. Normally investing at least 80% of assets in equity securities. Normally investing primarily in common stocks.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets. Value stocks can perform differently than other types of stocks and can continue to be undervalued by the market for long periods of time. Fidelity® Trend Fund
VRS Code: 00005

Fund Objective: Seeks growth of capital.

Fund Strategy: Investing in companies that FMR believes have above-average growth potential (stocks of these companies are often called “growth” stocks). Normally investing primarily in common stocks.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Growth stocks can perform differently from the market as a whole and can be more volatile than other types of stocks.

Fund short term trading fees: None

Fidelity® U.S. Government Reserves
VRS Code: 00050
Fund Objective: Seeks as high a level of current income as is consistent with the security of principal and liquidity.
Fund Strategy: Normally investing at least 80% of assets in U.S. Government securities and repurchase agreements for those securities. Potentially entering into reverse repurchase agreements.
Fund Risk: An investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at $1.00 per share, it is possible to lose money by investing in the fund. Interest rate increases can cause the price of money market securities to decrease.
Fund short term trading fees: None

Fidelity® U.S. Treasury Money Market Fund
VRS Code: 00415
Fund Objective: Seeks as high a level of current income as is consistent with the security of principal and liquidity.
Fund Strategy: Normally investing in securities whose interest is exempt from state and local income taxes. Normally investing at least 80% of assets in U.S. Treasury securities. Potentially entering into reverse repurchase agreements.
Fund Risk: An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at $1.00 per share, it is possible to lose money by investing in the fund. Interest rate increases can cause the price of a money market security to decrease.

Fidelity® Ultra-Short Bond Fund
VRS Code: 00812
Fund Objective: Seeks to obtain a high level of current income consistent with the preservation of capital.
Fund Strategy: Normally investing at least 80% of assets in investment-grade debt securities (those of medium and high quality) of all types, and repurchase agreements for those securities. Normally investing in U.S. dollar-denominated money market and investment-grade debt securities and repurchase agreements. Managing the fund to have similar overall interest rate risk to the Barclays 6 Month Swap Index. Normally maintaining a dollar-weighted average maturity of two years or less. Allocating assets across different market sectors and maturities. Investing more than 25% of total assets in the financial services industries. Investing in domestic and foreign issuers. Analyzing the credit quality of the issuer, security-specific features, current and potential future valuation, and trading opportunities to select investments. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-setting securities, to adjust the fund's risk exposure.
Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Changes in government regulation and interest rates and economic downturns can have a significant negative effect on issuers in the financial services sector. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-setting securities) that may increase market exposure, magnify investment risks, and cause losses to be realized more quickly.
Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.25% for shares held less than 60 days.
Fidelity® Value Strategies Fund - Class K
VRS Code: 02104
Fund Objective: Seeks capital appreciation.
Fund Strategy: Normally investing primarily in common stocks. Investing in securities of companies that FMR believes are undervalued in the marketplace in relation to factors such as assets, earnings, growth potential, or cash flow, or in relation to securities of other companies in the same industry (stocks of these companies are often called ‘value’ stocks). Normally investing primarily in common stocks.
Fund Risk: Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign markets can be more volatile than the U.S. market due to increased risks of adverse issuer, political, regulatory, market, or economic developments and can perform differently from the U.S. market. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. ‘Value’ stocks can perform differently from the market as a whole and other types of stocks and can continue to be undervalued by the market for long periods of time. In addition, the fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund.

**Fidelity® Global Bond Fund**

**VRS Code:** 02423

**Fund Objective:** Seeks a high level of current income.

**Fund Strategy:** Investing in securities issued throughout the world, including securities of issuers located in emerging markets. Normally investing at least 80% of the fund’s assets in debt securities of all types and repurchase agreements for those securities. Normally investing primarily in investment-grade debt securities. Allocating investments across different market sectors and maturities, as well as across different countries and regions. Investing up to 20% of the fund’s assets in lower-quality debt securities. Actively managing the fund’s currency exposures. Analyzing the credit quality of the issuer, security-specific features, current and potential future valuation, and trading opportunities to select investments. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default), options and futures contracts - and forward-settling securities, to adjust the fund’s risk exposure. Investing in Fidelity’s central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).

**Fund Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Foreign securities are subject to currency-exchange-rate, economic, and political risks, all of which are magnified in emerging markets. Lower-quality debt securities involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Leverage can increase market exposure, magnify investment risks, and cause losses to be realized more quickly. In addition, the fund is considered non-diversified and may have additional volatility because it can invest a significant portion of assets in securities of a small number of individual issuers.

**Fund short term trading fees:** None

**MetLife Fixed - New Account**

**VRS Code:** 97704

**Fund Objective:** Seeks to provide a competitive fixed interest rate while offering a guarantee of principal and interest.

**Fund Strategy:** The MetLife Fixed Account is backed by the General Account of Metropolitan Life Insurance Company. This General Account portfolio consists primarily of public and private securities, commercial and residential mortgages and U.S. agency securities. Like most annuity contracts, MetLife contracts contain withdrawal charges and terms for keeping it in force.

**Fund Risk:** The fund is backed by a diversified portfolio of fixed-income assets held in the general account of the issuer. Guarantees are subject to the claims paying ability of the issuer. Restrictions or fees may apply to exchanges or withdrawals. The Contracts provide for the payment of certain withdrawals and exchanges at book value during the terms of the Contracts. In order to maintain the Contract issuers’ promise to pay such withdrawals and exchanges at book value, the Contracts subject the fund and its participants to certain restrictions. For example, withdrawals prompted by certain events (e.g., layoffs, early retirement windows, spin-offs, sale of a division, facility closings, plan terminations, partial plan terminations, changes in laws or regulations) may be paid at the market value of the fund's securities, which may be less than your book value balance or may restrict withdrawals in these events. This annuity contract contains withdrawal charges and terms for keeping it in force. No restrictions or additional fees, including surrender charges, will apply to the amount you withdraw as a result of certain life events. Please see your certificate or contact Fidelity for more information.

Partial withdrawals or exchanges of up to 20.00% of your account balance may be made in any contract year without incurring contract surrender charges. Withdrawals or exchanges in excess of 20.00% may be subject to a surrender charge of up to 4.00% of the amount of the excess withdrawal or exchange. Please see your certificate or contact Fidelity for more information.

**Who may want to invest:**
- Someone who seeks a slightly higher yield over the long term than is offered by money market funds, but who is willing to accept slightly more investment risk.
- Someone who is interested in balancing an aggressive portfolio with an investment that seeks to provide a declared crediting rate that is reset on a periodic basis.
Footnotes:

Select Air Transportation Portfolio
VRS Code: 00034
Fund Objective: Seeks capital appreciation.
Fund Strategy: Investing primarily in companies engaged in the regional, national, and international movement of passengers, mail, and freight via aircraft. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.
Select Automotive Portfolio
VRS Code: 00502
Fund Objective: Seeks capital appreciation.
Fund Strategy: Investing primarily in companies engaged in the manufacture, marketing or sale of automobiles, trucks, specialty vehicles, parts, tires, and related services. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.
Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve increased political and economic risk, as well as exposure to currency fluctuations. Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund. The automotive industry is highly cyclical and can be significantly affected by labor relations and fluctuating component prices.
Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

Select Banking Portfolio
VRS Code: 00507
Fund Objective: Seeks capital appreciation.
Fund Strategy: Investing primarily in companies engaged in banking. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.
Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve increased political and economic risk, as well as exposure to currency fluctuations. Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The banking industry can be significantly affected by legislation that has reduced the separation between commercial and investment banking businesses, changed the laws governing capitalization requirements and the savings and loan industry, and increased competition. In addition, the banking industry can be significantly affected by changes in general economic conditions and interest rates.
Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.
Select Biotechnology Portfolio

VRS Code: 00042

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies engaged in the research, development, manufacture, and distribution of various biotechnological products, services, and processes and companies that benefit significantly from scientific and technological advances in biotechnology. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Focus funds can be more volatile because of their narrow concentration in a specific industry. The biotechnology industry can be significantly affected by patent considerations, intense competition, rapid technological change and obsolescence, and government regulation. The fund may have additional volatility because it can invest a significant portion of assets in securities of a small number of individual issuers.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

Select Brokerage and Investment Management Portfolio

VRS Code: 00068

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies engaged in stock brokerage, commodity brokerage, investment banking, tax-advantaged investment or investment sales, investment management, or related investment advisory services. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund. The electronics industry can be significantly affected by rapid obsolescence, intense competition, and global demand.

**Fund short term trading fees:** This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

**Select Energy Portfolio**

**VRS Code:** 00060

**Fund Objective:** Seeks capital appreciation.

**Fund Strategy:** Investing primarily in companies in the energy field, including the conventional areas of oil, gas, electricity and coal, and newer sources of energy such as nuclear, geothermal, oil shale and solar power. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.

**Fund Risk:** The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund. The energy industries can be significantly affected by fluctuations in energy prices and supply and demand of energy fuels, energy conservation, the success of exploration projects, and tax and other government regulations.

**Fund short term trading fees:** This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

Select Environment and Alternative Energy Portfolio

VRS Code: 00516

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies engaged in business activities related to alternative and renewable energy, energy efficiency, pollution control, water infrastructure, waste and recycling technologies, or other environmental support services. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks. Investing in domestic and foreign issuers.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Sector funds can be more volatile because of their narrow concentration in a specific industry. The environment and alternative energy industries can be significantly affected by government regulations and subsidies, changing supply and demand for traditional energy sources, and availability of funding for remedial cleanup efforts or development of new technologies, and can be subject to risks associated with hazardous materials. Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks. The fund may have additional volatility because it can invest a significant portion of assets in securities of a small number of individual issuers.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

Select Financial Services Portfolio

VRS Code: 00666

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies that provide financial services to consumers and industry. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The financials industries are subject to extensive government regulation, can be subject to relatively rapid change due to increasingly blurred distinctions between service segments, and can be significantly affected by availability and cost of capital funds, changes in interest rates, the rate of corporate and consumer debt defaults, and price competition.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

**Fund Strategy:** Investing primarily in companies engaged in research, design, production or distribution of products or processes that relate to software or information-based services. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.  
**Fund Risk:** The value of the fund's domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. Because FMR concentrates the fund's investments in a particular industry, the fund's performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. The fund is considered non-diversified and can invest a greater portion of assets in securities of individual issuers than a diversified fund; thus changes in the market value of a single investment could cause greater fluctuations in share price than would occur in a more diversified fund. The retail industry can be significantly affected by consumer confidence and spending, intense competition, and changing consumer tastes.  
**Fund short term trading fees:** This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

Select Telecommunications Portfolio

VRS Code: 00096

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies engaged in the development, manufacture, or sale of communications services or communications equipment. Normally investing at least 80% of assets in securities of companies principally engaged in these activities, generally emphasizing communications services companies and not communications equipment companies. Normally investing primarily in common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. Select Transportation Portfolio

VRS Code: 00512

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies engaged in providing transportation services or companies engaged in the design, manufacture, distribution, or sale of transportation equipment. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations. Select Utilities Portfolio

VRS Code: 00065

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies in the utilities industry and companies deriving a majority of their revenues from their utility operations. Normally investing at least 80% of assets in securities of companies principally engaged in these activities, generally emphasizing power and gas utilities and not telephone companies and telecommunications utilities. Normally investing primarily in common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations.

Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. While a diversified investment could cause greater fluctuations in share price than would occur in a more diversified fund, the utilities industry can be significantly affected by government regulation, financing difficulties, supply and demand of services or fuel, and natural resource conservation.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 0.75% for shares held less than 30 days.

Select Wireless Portfolio

VRS Code: 00963

Fund Objective: Seeks capital appreciation.

Fund Strategy: Investing primarily in companies engaged in activities relating to wireless communications services or products. Normally investing at least 80% of assets in securities of companies principally engaged in these activities. Normally investing primarily in common stocks.

Fund Risk: The value of the fund’s domestic and foreign investments will vary from day to day in response to many factors. Stock values fluctuate in response to issuer, political, regulatory, market, or economic developments. You may have a gain or loss when you sell your shares. Investments in foreign securities, especially those in emerging markets, involve risks in addition to those of U.S. investments, including increased political and economic risk, as well as exposure to currency fluctuations.

Because FMR concentrates the fund’s investments in a particular industry, the fund’s performance could depend heavily on the performance of that industry and could be more volatile than the performance of less concentrated funds and the market as a whole. While a diversified investment could cause greater fluctuations in share price than would occur in a more diversified fund, the wireless industry can be significantly affected by failure or delays in obtaining financing or regulatory approval, intense competition, product incompatibility, changing consumer preferences, rapid obsolescence, significant capital expenditures, and heavy debt burdens.

It is an unmanaged index of the common stock prices of 500 widely held U.S. stocks that includes the reinvestment of dividends.
- Initial offering of the Institutional Share Class took place on May 4, 2011. Returns prior to that date are those of the Fidelity Advantage Class and reflect the Fidelity Advantage Class’ expense ratio. Had the Institutional Class’ expense ratio been reflected, total returns would have been higher.

Spartan® Emerging Markets Index Fund - Fidelity Advantage Class
VRS Code: 02342

Fund Objective: The fund seeks to provide investment results that correspond to the total return of emerging stock markets.

Fund Strategy: Normally investing at least 80% of assets in securities included in the FTSE Emerging Index and in depository receipts representing securities included in the index. Using statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings ratio, price/book ratio, earnings growth, country weightings, and the effect of foreign taxes to attempt to replicate the returns of the FTSE Emerging Index. Lending securities to earn income for the fund.

Fund Risk: Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which are magnified in emerging markets.

Fund short term trading fees: This fund has a Short-term Redemption Fee of 1.50% for shares held less than 90 days.

- The Morgan Stanley Capital International All Country World Ex-US Index (MSCI AC World Ex-US Index) is a recognized benchmark of non-U.S. stock markets. It is an unmanaged index composed of a sample of companies representative of the market structure of 49 countries and includes reinvestment of all dividends. The MSCI AC World Ex-US Index, when including or excluding securities, takes into account any limitations that an international investor would experience when investing directly in such securities. The MSCI AC World Ex-US Index has been added as a comparison to a wider cross section of the marketplace in which the Fund invests, than the MSCI EAFE Index. The Net version of the MSCI AC World Ex-US adjusts for withholding taxes applicable to Massachusetts Business Trusts.

Spartan® Inflation-Protected Bond Index Fund - Fidelity Advantage Class
VRS Code: 02416

Fund Objective: Seeks to provide investment results that correspond to the total return of the inflation-protected sector of the United States Treasury market.

Fund Strategy: Normally investing at least 80% of assets in inflation-protected debt securities included in the Barclays U.S. Treasury Inflation-Protected Securities (TIPS) Index (Series-L). Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-settling securities, to adjust the fund’s risk exposure.

Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Increases in real interest rates can cause the price of inflation-protected debt securities to decrease. Interest payments on inflation-protected debt securities can be unpredictable. Leverage can increase market exposure, magnify investment risks, and cause losses to be realized more quickly. The performance of the fund and its index may vary somewhat due to factors such as transaction costs, sample selection, and timing differences associated with additions to and deletions from its index.

Spartan® Intermediate Treasury Bond Index Fund - Fidelity Advantage Class

VRS Code: 01564

Fund Objective: Seeks a high level of current income.

Fund Strategy: Normally investing at least 80% of assets in securities included in the Barclays 5-10 Year U.S. Treasury Index. Normally maintaining a dollar-weighted average maturity of 3 to 10 years. Engaging in transactions that have a leveraging effect on the fund.

Fund Risk: Bond funds contain interest rate risk (as interest rates rise bond prices usually fall); the risk of issuer default; and inflation risk. Leverage can increase market exposure and magnify investment risk.

Fund short term trading fees: None

Spartan® Long-Term Treasury Bond Index Fund - Fidelity Advantage Class

VRS Code: 01565

Fund Objective: Seeks a high level of current income.

Fund Strategy: Normally investing at least 80% of assets in securities included in the Barclays Long Year U.S. Treasury Index. Normally maintaining a dollar-weighted average maturity of 10 years or more. Engaging in transactions that have a leveraging effect on the fund.

Fund Risk: Bond funds contain interest rate risk (as interest rates rise bond prices usually fall); the risk of issuer default; and inflation risk. Leverage can increase market exposure and magnify investment risk.

Fund short term trading fees: None
Fund Risk: Bond funds contain interest rate risk (as interest rates rise bond prices usually fall); the risk of issuer default; and political, regulatory, market, or economic developments. Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Non-diversified funds can be more volatile because they can invest a greater portion of their assets in securities of a smaller number of individual issuers.

Spartan® U.S. Bond Index Fund - Fidelity Advantage Class

**VRS Code:** 02324

**Fund Objective:** Seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Barclays U.S. Aggregate Bond Index.

**Fund Strategy:** Normally investing at least 80% of the fund’s assets in bonds included in the Barclays U.S. Aggregate Bond Index. Using statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Index using a smaller number of securities. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-settling securities, to adjust the fund’s risk exposure. Investing in Fidelity’s central funds (specialized investment vehicles used by Fidelity funds to invest in particular security types or investment disciplines).
Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Strategic Advisers Small-Mid Cap Multi-Manager Fund

VRS Code: 02388

Fund Objective: Seeks capital appreciation.

Fund Strategy: Normally investing primarily in common stocks. Normally investing at least 80% of assets in securities of small and mid cap companies (which, for purposes of this fund, are those companies with market capitalizations similar to companies in the Russell 2500 Index) and in shares of other small and mid cap funds. Investing in domestic and foreign issuers. Investing in either “growth” stocks or “value” stocks or both. Implementing investment strategies by investing directly in securities through one or more managers (sub-advisers) or indirectly in securities through one or more other funds, referred to as underlying funds, which in turn invest directly in securities. Allocating assets among affiliated small and mid cap funds (i.e., Fidelity funds) and non-affiliated small and mid cap funds that participate in Fidelity’s FundsNetwork, and non-affiliated exchange traded funds (ETFs) (underlying funds) and sub-advisers. Allocating assets among underlying funds and sub-advisers to achieve portfolio characteristics similar to those of the Russell 2500 Index.

Fund Risk: Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. These risks may be magnified in foreign markets. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. The securities of smaller, less well-known companies can be more volatile than those of larger companies. The fund can invest in ETFs which may trade at a discount to their NAV. Fund of funds bear the risks of the investment strategies of their underlying funds.

Strategic Advisers® Core Income Multi-Manager Fund

VRS Code: 02436

Fund Objective: The fund seeks a high level of current income.

Fund Strategy: Normally investing primarily in investment-grade debt securities (those of medium and high quality) of all types and repurchase agreements for those securities. Investing up to 30% of assets in high yield and emerging market debt securities. Investing in domestic and foreign issuers. Engaging in transactions that have a leveraging effect on the fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default) and futures contracts - and forward-settling securities, to adjust the fund’s risk exposure. Implementing investment strategies by investing directly in securities through one or more managers (sub-advisers) or indirectly in securities through one or more other funds, referred to as underlying funds, which in turn invest directly in securities. Allocating assets among affiliated fixed-income funds (i.e., Fidelity funds) and non-affiliated fixed-income funds that participate in Fidelity’s FundsNetwork, and non-affiliated exchange traded funds (ETFs) (underlying funds) and sub-advisers. Allocating assets among underlying funds and sub-advisers to achieve portfolio characteristics similar to those of the Barclays U.S. Aggregate Bond Index. Allocating assets among underlying funds and sub-advisers to attempt to diversify its portfolio in terms of different market sectors and maturities.
**Fund Risk:** In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk, liquidity risk, call risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. The fund may invest in lower-quality debt securities that involve greater risk of default or price changes due to potential changes in the credit quality of the issuer. Prepayment of principal prior to a securities maturity can cause greater price volatility if interest rates change. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks, all of which may be magnified in emerging markets. The fund can invest in securities that may have a leveraging effect (such as derivatives and forward-settling securities) that may increase market exposure, magnify investment risks, and cause losses to be realized more quickly. The fund can invest in ETFs which may trade at a discount to their NAV. Fund of funds bear the risks of the investment strategies of their underlying funds.

**Strategic Advisers® Core Multi-Manager Fund**

**VRS Code:** 02382

**Fund Objective:** Seeks capital appreciation.

**Fund Strategy:** Normally investing primarily in common stocks. Normally investing primarily in securities of companies with large market capitalizations (which, for purposes of this fund, are those companies with market capitalizations similar to companies in the S&P 500 Index). Investing in domestic and foreign issuers. Investing in either “growth” stocks or “value” stocks or both. Implementing investment strategies by investing directly in securities through one or more managers (sub-advisers) or indirectly in securities through one or more other funds, referred to as underlying funds, which in turn invest directly in securities. Allocating assets among affiliated equity funds (i.e., Fidelity funds) and non-affiliated equity funds that participate in Fidelity’s FundsNetwork, and non-affiliated exchange traded funds (ETFs) (underlying funds) and sub-advisers.

**Fund Risk:** Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments. These risks may be magnified in foreign markets. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. Value and growth stocks can perform differently from other types of stocks. Growth stocks can be more volatile. Value stocks can continue to be undervalued by the market for long periods of time. Changes in realestate values or economic downturns can have a significant negative effect on issuers in the real estate industry. The fund can invest in ETFs which may trade at a discount to their NAV. Fund of funds bear the risks of the investment strategies of their underlying funds. The fund may have additional volatility because it can invest a significant portion of assets in securities of a small number of individual issuers.

Strategic Advisers® Income Opportunities Fund of Funds

VRS Code: 02434

Fund Objective: The fund seeks a high level of current income. The fund may also seek capital appreciation.

Fund Strategy: Normally investing primarily in income-producing debt securities, preferred stocks, and convertible securities, with an emphasis on lower-quality debt securities. Potentially investing in non-income producing securities, including defaulted securities and common stocks. Investing in companies in troubled or uncertain financial condition. Investing in domestic and foreign issuers. Implementing investment strategies by investing indirectly in securities through one or more other funds, referred to as underlying funds, which in turn invest directly in securities (as described below). Allocating assets among affiliated high yield funds (i.e., Fidelity funds) and non-affiliated high yield funds that participate in Fidelity’s FundsNetwork, and non-affiliated exchange traded funds (ETFs) (underlying funds). Allocating assets among underlying funds to achieve portfolio characteristics similar to those of The BofA Merrill Lynch US High Yield Constrained Index. Allocating assets among underlying funds using proprietary fundamental and quantitative fund research, considering factors including fund performance, a fund manager’s experience and investment style, fund company infrastructure, and fund characteristics such as expense ratio, asset size, and portfolio turnover.

Fund Risk: In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. Strategic Advisers® Value Multi-Manager Fund

VRS Code: 02384

**Fund Objective:** Seeks capital appreciation.

**Fund Strategy:** Normally investing primarily in common stocks. Investing in companies that are believed to be undervalued in the marketplace in relation to factors such as assets, sales, earnings, growth potential, or cash flow, or in relation to securities of other companies in the same industry (stocks of these companies are often called “value” stocks). Normally investing primarily in securities of companies with large market capitalizations (which, for purposes of this fund, are those companies with market capitalizations similar to companies in the Russell 1000 Value Index). Investing in domestic and foreign issuers.
