- Holding pond/settling basin sludge
- Holding pond/settling basin liquid
- Dead bird composter
- Poultry deep stack
- Poultry full house cleanout
- Poultry cake
- Other: _____

Date Sampled: _____ Age of Manure: _____

Additional Information: _____

Sampling/Shipping/Packaging Instructions:

Consult FSA9519 (<http://www.uaex.edu/publications/PDF/FSA-9519.pdf>) for instructions on collecting a representative sample of moist/dry litter. Submit a composite sample of one pint of representative material in a labeled and sealed, quart-size plastic bag.

Liquid manures should be sent to the lab in labeled, unbreakable, plastic bottles (500 ml volume) that are securely closed. See local County Extension Office to obtain sample bottles. Sampling instructions for liquid manures can be found at http://cars.uark.edu/bcret_home/reports/docs/Sampling%20Liquid%20Manure%204_27_10.pdf. Bottles should be filled no more than three-fourths full to allow for expansion from gas buildup.

Double bag any sample with "obnoxious odor" to adhere to shipping policies and send with this form to the Agricultural Diagnostic Laboratory.

Prices listed are current as of June 1, 2019. Prices are subject to change without notice.

University of Arkansas, United States Department of Agriculture and County Governments cooperating.
