

General	By Chad Norton and Chris Elkins. Rain was somewhat spotty with most fields getting some, there were a few that didn't. However, Jefferson got dumped on, receiving 3.7". Irrigation has started in some more fields with several more scheduled very soon. Insect pressure remains very low but that is expected to change over the next couple weeks as corn earworms begin emerging out of corn fields. Diseases are not an issue as of now. Refer to table below for field specific information.		
County	Variety	Stage	General Information
Arkansas - 1	Asgrow AG46X6	R1	Seems to be growing out of ALS symptomology, new growth looks much better. Started blooming. Recommended 1.5 pt. Flexstar for pigweeds. Initial irrigation 7-15 if no rain.
Arkansas - 2	Pioneer P45A29L	R3	Received .5" rain. Initial irrigation applied 7-9. Middles lapped. Second irrigation 7-18 if no rain. Insect and disease free.
Ashley	Terral REV 48A26	R2	Received .4" rain. Initial irrigation applied 7-11. Second irrigation 7-19 if no rain. Clean.
Chicot	Armor 46D08	V5	Received 1.1" rain. Some grass and broadleaves emerged. Recommended 1 qt. Cornerstone + 1.3 pt. Dual Magnum.
Clark	Pioneer P48A32X	V5	Received .69" rain. 2 oz. Zidua + 24 oz. Envy 6 Max applied 7-3. Initial irrigation on 7-19 if no rain.
Cross	Armor 48D24	R2	Received .3", Should have full canopy next week, low insect pressure, Applied 7/1 32oz glyphosate. Initial irrigation scheduled for July 7.
Desha	Armor 48D24	R3	1 qt. Cornerstone + 1 qt. Prefix applied 7-8. Initial irrigation applied 7-9. Looks good. Insect and disease free.
Greene	Stine 49LD02	V4	Received .75" rain, Applied 7/4 32oz Liberty + 1.25 pts s-metolachlor. Good control of emerged weeds, Initial irrigation July 15.
Jackson - 1	UA 5414RR	V5	Received 1.25" rain, Applied 22oz Roundup Powermax + 1pt. Flexstar July 4, quickly filling in crop canopy.
Jackson - 2	Pioneer 47A76L	R2	Received .4" rain, good control of late flush of pigweeds, low levels of Greene/Brown stinkbugs, Should have good canopy next week.
Jefferson	Pioneer P43A42X	R2	Received 3.7" rain after initial irrigation on 7-5. Very clean and rapidly growing. Second irrigation 7-21 if no rain. Insect and disease free.
Lawrence	Asgrow 46X6	R3	Received no rain, Almost R4, most of the field now has good canopy, Stinkbug pressure 3/25, second irrigation July 9.
Lee	Pioneer P47T36R	R2	Initial irrigation applied 7-9. Second irrigation 7-19 if no rain. Very clean good looking field. Free of insects and diseases.
Lonoke	Bayer CZ 4918 LL	R1	Started blooming. Initial irrigation applied 7-5 to activate Zidua. Second irrigation 7-19 if no rain. Some emerged morningglories, will evaluate again next week.
Miller	Merschman Miami 1949 LL	V9	Dryland. Good control of vast majority of pigweeds, few still trying to hold on. Need to keep getting rain.
Mississippi	Asgrow 46X6	V6	Received .175" rain. Excellent growth, Applied 7/2 32oz glyphosate + 48oz Warrant Ultra. Initial Irrigation scheduled for July 16.
Monroe	Progeny 5414 LL	V8	1 qt. Liberty + 8 oz. Select applied 7-9. Initial irrigation 7-17 if no rain. Insect and disease free.
Phillips	Stine 49LH02	R1	Dryland. Started flowering. 1 qt. Liberty + 1.2 pt. Dual Magnum applied 7-9. Need rain to activate.

Poinsett	Drewsoy 5.0	V4	Received .85" rain. Good drainage allowed for quick recovery from heavy rains minimal loss of stand recommended 8oz Intensity + 1pt metolachlor.
White	Terral REV 47L38	V6	Received .25" rain, Applied 7/6 32oz Interline + 1pt metolachlor. Initial irrigation scheduled for July 11.
Woodruff	Stine 51LI32	V3	Received .1" rain, Excellent growth, pre-emerge starting to break, recommended 32oz Liberty.
