

General	By Chad Norton and Chris Elkins. All fields are now planted as St. Francis has decided not to plant. Rain was again spotty again this past week ranging from zero at several locations to 4.7" at Poinsett. More fields are beginning to move into reproductive stages. Irrigation as begun in northeast Arkansas and will start statewide if no rain in the next week. Insects have not been a problem in program fields yet. Diseases have been a "no show". Refer to table below for field specific information.		
County	Variety	Stage	General Information
Arkansas - 1	Asgrow AG46X6	V5	Received .75" rain. Sprayed 6-26 with 22 oz. RoundUp PowerMax + 1.2 pt. Dual Magnum. ALS herbicide symptoms across field, not sure if from tank contamination or drift from nearby rice field, pretty uniform. Should take off growing now.
Arkansas - 2	Pioneer P45A29L	R2	Very good growth over the past week. Looking good. Initial irrigation 7-8 if no rain. Very close to lapping middles.
Ashley	Terral REV 48A26	R2	Received 1.86" rain. Sprayed 6-28 with 1 qt. Prefix + 6 oz. Flexstar, very good control. Initial irrigation 7-8 if no rain. Very clean.
Chicot	Armor 46D08	V2	Received .88" rain. Still clean from land preparation and herbicide app.
Clark	Pioneer P48A32X	V3	Ultra Blazer app cleaned up pigweeds. Some garden webworms, of all things, in field. Will evaluate again next week.
Cross	Armor 48D24	R1	Received .8", Did not get sprayed previous week, recommended 32oz glyphosate for emerged weed control. Initial irrigation scheduled for July 5
Desha	Armor 48D24	R2	Moving along, tremendous growth over the past week. Getting a little hairy, should be sprayed soon with 1 qt. Cornerstone + 1 qt. Prefix. Initial irrigation 7-9 if no rain.
Greene	Stine 49LD02	V2	Received .2" rain, Almost V3, good growth, several emerged morning glories and light pigweeds. Recommended 32oz Liberty + 1.25 pts s-metolachlor.
Jackson - 1	UA 5414RR	V3	Received .3" rain, Continues to have good growth, starting to have light grass and broadleaf pressure, recommend 22oz Roundup Powermax + 1pt. Flexstar.
Jackson - 2	Pioneer 47A76L	R1	Received .4" rain, Several pigweeds emerged and on 7/3 applied 1 pt. Flexstar. Insect pressure remains low.
Jefferson	Pioneer P43A42X	R1	Started blooming. Very clean from herbicide apps. Laid polypipe. Initial irrigation 7-12 if no rain. Should begin rapid growth over next week.
Lawrence	Asgrow 46X6	R3	Received 2.15" rain, Should canopy soon, remains clean, Stinkbug pressure dropped to 4/25, second irrigation scheduled for July 8.
Lee	Pioneer P47T36R	R2	Received 1.35" rain, pushing initial irrigation to 7-12 if no rain. Remains very clean, Could be good.
Lonoke	Bayer CZ 4918 LL	V7	Field cleaned up from Blazer app 6-29. Initial irrigation 7-13 if no rain.
Miller	Merschman Miami 1949 LL	V7	Dryland. Received 1.25" rain. Flexstar seems to be working very well on pigweeds. Need to keep getting rains. Looks much better this past week. Though blooming would have started.
Mississippi	Asgrow 46X6	V4	Received .1" rain. Excellent growth, Still needs to be sprayed for grass and broadleaf pressure, recommended 32oz glyphosate + 2pts Prefix + 6oz Flexstar.

Monroe	Progeny 5414 LL	V6	Received .6" rain. Field is very clean except along west edge due to application error. Tremendous growth over the past week. Probably going to get by without another herbicide app, very close to lapping. Looking much better.
Phillips	Stine 49LH02	V5	Dryland. Received 2" rain. Not sprayed. Additional rainfall would have been perfect on Dual app if sprayed. Emerged pigweeds, probably too large to control. Again, recommended 1 qt. Liberty + 1.3 pt. Dual.
Poinsett	Drewsoy 5.0	V2	Received 4.7" rain. Heavy rains will reduce stands on lower end, plants are stressed from excess moisture, light weed pressure will hold off on herbicide application until plants no longer stressed.
White	Terral REV 47L38	V3	Received .2" rain, Almost V4, pre-emerge starting to break, recommend 32oz Liberty + 1pt s-metolachlor.
Woodruff	Stine 51LI32	V1	Received .5" rain, plant population 144,000 plants/acre, excellent stand, pre-emerge is holding and remains very clean.
