

## Corn and Grain Sorghum Weekly Update – August 30, 2019

2019 Update

### Corn and Grain Sorghum Research Verification – Chuck Capps (Corn & GS Verification Coordinator)

The Monroe and White County Fields should be at or reach black layer this weekend. Harvest of Desha County field began on Wednesday and was being taken to on farm grain bins. We are gathering the weigh tickets to get yield, and I will report yields once we have all or most in. This will be the final weekly report until we have our yields to report from all or most of our Corn & Grain Sorghum Research Verification Program Fields.

**Table 1.**

County	Heat Units	Crop Stage	Crop Notes
Arkansas	2818	R6	Reached black layer on 8-7-19.
Chicot	2832	R6	Reached black layer on 8-6-19.
Clay	2826	R6	Reached black layer on 8-6-19.
Desha	2858	R6	Reached black layer on 8-9-19.
Jefferson	2828	R6	Reached black layer on 8-7-19.
Lawrence	2901	R6	Reached black layer on 8-10-19.
Mississippi	2783	R6	Reached black layer on 8-13-19
Monroe	2820	R5	Field was at 80% starch on 8-27.
Prairie	2778	R6	Reached Black layer on 7-29-19.
White	2802	R5	The field is over 90% starch but not quite black layer on 8-27.
