ROW CROP VERIFICATION

**2018-19 Wheat Research
Verification Program Update**

March 15, 2019

Update No. 5

General	<p>By Chad Norton and Chris Elkins. Rain delayed nitrogen application on the Greene County Field. The Forecast for the upcoming week should allow opportunity to apply remaining nitrogen and excellent growing conditions. Disease and insect pressure remain low.</p>		
County	Variety	Feekes Stage	General Information
Ashley	Pioneer 26R41	5	Recent cold front slowed growth and little change was noticed from previous week.
Greene	Pioneer 26R41	4	Starting to see new growth. 3/12/19 applied .9 oz. Harmony Extra + NIS. Recommended 100lbs Urea.
