

Arkansas
ROW CROP VERIFICATION

**2018-19 Wheat Research
Verification Program Update**

March 22, 2019

Update No. 7

General	<p>By Chad Norton and Chris Elkins. Warmer, drier weather helped wheat get moving again. Fertilizer application are almost finished as we get close to jointing on all fields. Insect pressure remains low. Disease pressure has picked up but remain low in the canopy. With a good weather forecast we are expecting to see excellent growth again this coming week.</p>		
County	Variety	Feekes Stage	General Information
Ashley	Pioneer 26R41	6	Excellent growth over the past week. Some frost damage scattered across the field.
Greene	Pioneer 26R41	5	Excellent Growth. 3/19/19 applied 100lbs Urea. Recommended 100lbs Urea. Starting to see Septoria in the lower canopy.
