### General
By Chad Norton and Chris Elkins. Wheat fields are starting to green up and hopefully are past the roughest part of winter. Slightly drier condition have allowed for fertilizer application to be applied. Weed pressure has been picking up and both verification fields will be treated with a herbicide. Disease and insect pressure remain low.

### County | Variety | Feekes Stage | General Information
--- | --- | --- | ---
Lawrence | Dixie Brown | 4 | Growth remains slow, Applied 100 lbs/ac Urea by air on 2/29, Recommended 2 oz/ac Powerflex HL for ryegrass control.
