

Arkansas  
**ROW CROP VERIFICATION**

**2018-19 Wheat Research  
Verification Program Update**

**April 19, 2019**

**Update No. 9**

<b>General</b>	By Chad Norton and Chris Elkins. WRVP fields continue to develop quickly. Rainy weather continues to be the biggest challenge facing the 2019 wheat crop. Drier weather at this point would be beneficial and help to reduce potential disease development. Insect pressure has not been a factor so far this season.		
<b>County</b>	<b>Variety</b>	<b>Feekes Stage</b>	<b>General Information</b>
Ashley	Pioneer 26R41	10.5.2	Prosaro application scheduled 4/20 for Scab prevention. Would appreciate some "dry" weather
Greene	Pioneer 26R41	10.1	Excellent growth, quality is variable across the field. Disease pressure remains low in canopy.
