Make MyPlate Work for You

MyPlate illustrates what healthy food choices look like on a plate. It’s important to think about all five food groups when filling your plate.

Remember to:

- Make half your plate fruits and vegetables.
- Make at least half your grains whole grains.
- Choose lean protein.
- Switch to fat-free or low-fat (1%) milk.

Different people need different amounts of food each day. To find the right amount for you visit ChooseMyPlate.gov/myplate/index.aspx. Food labels help us compare and choose foods. They state where the food came from and how much food is in the package. The ingredient list tells us everything the food is made from. The food package also has a sell-by or a use-by date. This tells us how long it is safe to eat the food. The Nutrition Facts label tells us how many nutrients are in one serving of the food.

Let’s practice reading food labels. Look at this Nutrition Facts Label from a yogurt container and answer the following questions:

1. What is the serving size of the yogurt? ______________
2. How many servings are in the container? _____
3. How much protein is in one serving of yogurt? _________
4. How much calcium is in one serving of yogurt? ___________
