

Table of Contents

1 – Introduction	1	Broadleaf and Aquatic Weed Control	57
2 – Rice Growth and Development	9	Aim	58
Vegetative Phase	11	Basagran, Ultra Blazer and Storm	58
Reproductive Phase	14	Grandstand-R 3SL	58
Ripening Phase	19	Londax 60DF.....	59
Effect of Temperature on Growth and		Loyant.....	59
Development of Rice	20	Permit or Permit Plus	59
3 – Rice Cultivars and Seed Production	21	Sharpen	59
Rice Seed Production.....	22	Strada	60
Genetically Modified Rice	23	Regiment.....	60
Rice Cultivar Performance and Agronomic Characteristics	23	Grasp	60
Other Cultivars	28	2,4-D	60
Kernel Classification and Cooking Qualities.....	28	Aquatic Weed Control.....	60
4 – Rice Stand Establishment	29	Harvest Aids – Sodium Chlorate	61
Seeding Rate.....	29	8 – Chemical Applications	63
Seed Treatments.....	31	Soil Applications of Pesticides.....	63
Seeding Date and Soil Temperatures	33	Ground-Based Applications.....	63
Tillage and Post-Seeding Management	36	Aerial Applications	64
References	38	Postemergence Applications of Pesticides	65
5 – Water-Seeded Rice	39	Ground-Based Applications.....	65
Conventional Water-Seeding	39	Aerial Applications	65
Field Preparation	39	Pesticide Drift.....	65
Methods of Presoaking	40	Flag the Technology	66
Water Management	40	Fertilizers.....	67
Nutrient Management.....	40	Ground Applied	67
Weed Control.....	41	Aerially Applied.....	67
Insect Control	42	Material Property Effects	68
No-Till Water-Seeded Rice	42	General Recommendations.....	68
Rice Stubble Management.....	42	9 – Soil Fertility	69
Nitrogen Management	42	Nitrogen.....	69
6 – DD50 Computerized Rice		Nitrogen Fertilizer Rates.....	69
Management Program	43	Standard Method	69
How to Use the DD50	44	Nitrogen-Soil Test for Rice (N-STaR).....	70
Uses of the DD50.....	45	Dry Seeding	73
Explanation of the DD50 Printout.....	45	Early N Application and Management	74
Growth Stages	46	Midseason N Application and Management	78
Herbicides	46	Water-Seeding – Pinpoint Flood	80
Other	47	Conservation or No-Till Systems.....	80
Example DD50 Printout	49	Soil Sampling and Soil Analysis	81
7 – Rice Weed Control	51	Sulfur	83
Herbicide Resistance Management	52	Phosphorous and Potassium	85
Clearfield Rice.....	52	Phosphorous	85
Provisia Rice	53	Potassium	87
Grass Weed Control	53	Poultry Litter as a Fertilizer Source on	
Propanil	53	Nongraded Fields.....	90
Clincher and Ricestar HT	55	Liming	91
Residual Herbicides	56	Zinc	92
Bolero 8E.....	56	Preplant and Delayed-Pre Zn Application	94
Command 3ME.....	56	Preflood Applications	96
Quinclorac	56	Salvage Treatment for Zn Deficiency	96
League.....	57	Salinity	97
Prowl H ₂ O	57	Management of Saline Soils.....	98
		Diagnostic Soil and Plant Tissue Sampling	98
		Fertilization and Management of Precision-Graded Soils	99
		General Fertility	99
		Rate of Poultry Litter.....	100
		Management Tips.....	101

10 – Water Management.....	103	Minor Rice Insects.....	159
Determining Water Needs	103	Armyworms: True Armyworm and Fall Armyworm.....	159
Determining Pump Flow	104	Aphids: Greenbug and Bird Cherry-Oat Aphid	161
Pumping Cost	107	Rice Stalk Borer.....	162
Well Operation.....	108	Sugarcane Borer	164
Irrigation Water Quality	109	Other Stem Borer Species.....	165
Establishing Levees	110	Billbug	165
Land Grading	111	Rice Seed Midges	166
Water Delivery to Fields	111	Grasshoppers.....	167
Multiple Inlet Irrigation.....	112	Chinch Bug.....	168
Furrow-Irrigated Rice	114	13 – Rice Grades	169
Cultivar Selection.....	114	Factors Affecting Rice Grade	170
Seed Treatments	115	Grain Moisture Content.....	170
Planting Furrow-Irrigated Rice	115	Head Rice and Milling Yields.....	171
Fertility Management	115	Foreign Matter	171
Weed Management	116	14 – Laboratory Measurement	
Disease Management.....	116	of Rice Milling Yield	173
Insect Management	117	Definitions	173
Irrigation Management.....	117	Introduction	174
Budgeting for Furrow Versus Flood Irrigation	119	Laboratory Assessment of Milling Yield.....	174
Sprinkler-Irrigated Rice	119	Surface Lipid Content as a Measure of	
Intermittent Flood or Alternate		Degree of Milling	176
Wetting and Drying (AWD).....	120	Factors that Impact Degree of Milling	177
What Is Alternate Wetting and Drying.....	120	Accounting for Degree of Milling	
Potential Benefits	120	When Determining Milling Yield.....	179
Potential Risks.....	120	Impact of Degree of Milling on End-Use Functionality.....	179
Getting Started.....	120	Summary.....	179
Pest Control in AWD	122	References	180
Fertility Management	122	15 – Production Factors Impacting	
Irrigation Termination.....	122	Rice Milling Yield.....	181
Utilizing Surface Water for Irrigation		Nighttime Air Temperature	181
in Critical Groundwater Areas.....	124	Harvest Moisture Content.....	183
Critical Groundwater Designations	124	Other Production Factors	185
State Income Tax Credits for Groundwater		Summary.....	185
Conservation in Critical Areas.....	124	References	186
Federal Soil and Water Conservation		16 – Fundamentals of On-Farm	
Financial Incentive Programs.....	125	Rice Drying and Storage	187
Surface Water Storage and Water Reuse.....	126	Tips for Rice Drying.....	187
Keys to Water Management Success	127	Tips for Rice Storage	199
Critical Water Management Situations	128	17 – Rice Research Verification Program.....	191
11 – Management of Rice Diseases.....	129	Program Goals.....	191
Sheath Blight.....	130	Program Objectives	191
Blast	134	Program Summary.....	191
Stem Rot	136	18 – Rice Farm Safety.....	197
Crown (Black) Sheath Rot.....	136	General Precautions.....	198
Kernel Smut	137	Have a Plan to Reduce Hazards	198
False Smut	138	Field Safety.....	198
Bacterial Panicle Blight.....	139	Grain Handling Safety.....	200
Brown Spot	139	Traffic and Road Transport Safety.....	202
Straighthead	140	Irrigation Safety.....	202
Autumn Decline or Akiochi	141	OSHA	203
Narrow Brown Leaf Spot.....	141	Summary.....	203
Other Minor Diseases.....	142	19 – Glossary of Rice Industry Terms.....	205
12 – Insect Management in Rice	145		
Major Pests of Rice	146		
Grape Colaspis or Lespedeza Worm.....	146		
Rice Water Weevil	148		
Rice Stink Bug	154
