

Table of Contents

1 – Introduction	1	Residual Herbicides	57
2 – Rice Growth and Development.....	9	Bolero 8E.....	57
Vegetative Phase	11	Command 3ME	58
Reproductive Phase	14	Quinclorac.....	58
Ripening Phase.....	19	Prowl H ₂ O.....	59
Effect of Temperature on Growth and		Broadleaf and Aquatic Weed Control	59
Development of Rice.....	20	Aim	59
3 – Rice Cultivars and Seed Production	21	Basagran, Ultra Blazer and Storm.....	59
Rice Seed Production	22	Grandstand-R 3SL.....	60
Genetically Modified Rice	23	Londax 60DF	60
Rice Cultivar Performance and		Permit or Permit Plus.....	60
Agronomic Characteristics.....	23	Strada	61
Other Cultivars	28	Regiment	61
Kernel Classification and Cooking Qualities.....	28	Grasp	61
4 – Rice Stand Establishment	31	2,4-D.....	61
Seeding Rate.....	31	Aquatic Weed Control	61
Seed Treatments.....	33	Harvest Aids – Sodium Chlorate	62
Seeding Date and Soil Temperatures.....	35	8 – Chemical Applications.....	63
Tillage and Post-Seeding Management	38	Soil Applications of Pesticides.....	63
References	40	Ground-Based Applications	63
5 – Water-Seeded Rice	41	Aerial Applications.....	64
Conventional Water-Seeding.....	41	Postemergence Applications of Pesticides.....	65
Field Preparation.....	41	Ground-Based Applications	65
Methods of Presoaking.....	42	Aerial Applications.....	65
Water Management.....	42	Pesticide Drift.....	65
Nutrient Management	42	Flag the Technology	66
Weed Control	43	Fertilizers.....	67
Insect Control.....	44	Ground Applied.....	67
No-Till Water-Seeded Rice	44	Aerially Applied	67
Rice Stubble Management	44	Material Property Effects.....	68
Nitrogen Management.....	44	General Recommendations.....	68
6 – DD50 Computerized Rice		9 – Soil Fertility.....	69
Management Program	45	Nitrogen.....	69
How to Use the DD50	46	Nitrogen Fertilizer Rates	69
Uses of the DD50	47	Standard Method.....	69
Explanation of the DD50 Printout.....	47	Nitrogen-Soil Test for Rice (N-STaR)	71
Growth Stages.....	48	Dry Seeding.....	73
Herbicides	49	Early N Application and Management	74
Other.....	49	Midseason N Application and Management	78
Example DD50 Printout.....	51	Water-Seeding – Pinpoint Flood	79
7 – Rice Weed Control.....	53	Conservation or No-Till Systems	80
Herbicide Resistance Management	54	Soil Sampling and Soil Analysis	80
Clearfield Rice.....	54	Sulfur	82
Grass Weed Control	55	Phosphorous and Potassium	84
Propanil	55	Phosphorous	84
Clincher and Ricestar HT.....	57	Potassium.....	87
		Poultry Litter as a Fertilizer Source on	
		Nongraded Fields	89
		Liming	91

Zinc	91	Minor Rice Insects	152
Preplant and Delayed-Pre Zn Application	94	True Armyworm	153
Preflood Applications	95	Fall Armyworm	155
Salvage Treatment for Zn Deficiency	96	Aphids	155
Salinity	96	Rice Stalk Borer	156
Management of Saline Soils	97	Sugarcane Borer	158
Diagnostic Soil and Plant Tissue Sampling	98	Other Stem Borer Species	159
Fertilization and Management		Rice Seed Midges	160
of Precision-Graded Soils	98	Grasshoppers	161
General Fertility	98	Chinch Bug	162
Rate of Poultry Litter	99		
Management Tips	101	13 – Rice Grades.....163	
10 – Water Management.....103		Factors Affecting Rice Grade	164
Determining Water Needs	103	Grain Moisture Content	164
Determining Pump Flow	104	Head Rice and Milling Yields.....	165
Pumping Cost	107	Foreign Matter	165
Well Operation.....	108	14 – Laboratory Measurement	
Irrigation Water Quality	109	of Rice Milling Yield.....167	
Establishing Levees	110	Definitions	167
Land Grading.....	111	Introduction	168
Water Delivery to Fields	111	Laboratory Assessment of Milling Yield.....	168
Multiple Inlet Irrigation	112	Surface Lipid Content as a Measure of	
Furrow-Irrigated Rice	114	Degree of Milling.....	170
Sprinkler-Irrigated Rice	115	Factors that Impact Degree of Milling.....	171
Intermittent Flood or Alternate		Accounting for Degree of Milling	
Wetting and Drying (AWD).....	116	When Determining Milling Yield	173
Irrigation Termination	116	Impact of Degree of Milling on End-Use Functionality ..	173
Utilizing Surface Water for Irrigation		Summary.....	173
in Critical Groundwater Areas	117	References	174
Critical Groundwater Designations.....	117	15 – Factors Affecting the Measurement	
State Income Tax Credits for Groundwater		of Rice Milling Quality.....177	
Conservation in Critical Areas	118	Nighttime Air Temperature	177
Federal Soil and Water Conservation		Harvest Moisture Content.....	179
Financial Incentive Programs	119	Other Production Factors	181
Surface Water Storage and Water Reuse	119	Summary.....	181
Keys to Water Management Success	121	References	182
Critical Water Management Situations	122	16 – Fundamentals of On-Farm	
11 – Management of Rice Diseases.....123		Rice Drying and Storage.....185	
Sheath Blight.....	124	Tips for Rice Drying	185
Blast	128	Tips for Rice Storage	188
Stem Rot	130	17 – Rice Research Verification Program.....189	
Crown (Black) Sheath Rot.....	130	Program Goals.....	189
Kernel Smut	131	Program Objectives	189
False Smut	132	Program Summary	189
Bacterial Panicle Blight.....	133	18 – Rice Farm Safety	195
Brown Spot	133	General Precautions.....	196
Straighthead	134	Have a Plan to Reduce Hazards	196
Autumn Decline or Akiochi	135	Field Safety.....	196
Narrow Brown Leaf Spot.....	135	Grain Handling Safety.....	198
Other Minor Diseases.....	136	Traffic and Road Transport Safety.....	200
12 – Insect Management in Rice	139	Irrigation Safety.....	200
Major Pests of Rice.....	140	OSHA.....	201
Rice Water Weevil.....	140	Summary.....	201
Rice Stink Bug	147	19 – Glossary of Rice Industry Terms.....203	
Grape Colaspis or Lespedeza Worm	151
