Subject: National Cyber Security Awareness Month - Week 3 – The theme is **Recognizing and Combating Cybercrime**

Attachments: None

We are excited to kick off the third week of security awareness month. For this week we focus on cyber criminals. Specifically, how they attack people and what you can do to stop them. We have a tremendous number of resources to help you, starting with the following.

- On Tuesday you will receive a security awareness newsletter on Ransomware. This has become a very common and highly successful attack technique used by cyber criminals around the world. You need to be aware of this.
- On Wednesday you will receive a poster on not becoming a victim of cyberheist.
- On Thursday we will focus on one of the most important steps you can do to protect yourself and your accounts from cyber criminals – enabling two-step verification.
- On Friday we will distribute a poster on how you can identify and stop phishing attacks, one of the most common attack methods used by cyber criminals today.

You are encouraged to share these materials with others, including your family, friends and neighbors. If you have any questions about our activities in October or suggestions on how to improve our cyber security efforts, please contact your CyberSecurity Team.
