Have you recently had the opportunity to purchase some “smart” devices that everyone seems to be referring to as the Internet of Things (IoT)? An IoT device is really just another computer, but one where you don’t have much say in what software runs on it, or whether it can be patched properly, or even secured at all.

Visit the following site for 7 tips for securing the Internet of Things:

https://nakedsecurity.sophos.com/2016/03/07/7-tips-for-securing-the-internet-of-things/

You are encouraged to share these materials with others, including your family, friends and neighbors. If you have any questions about our activities in October or suggestions on how to improve our cybersecurity efforts, please contact your CyberSecurity Team.
